About the Author

Michael R. Groh is a well-known author, writer, and consultant specializing in Windows database systems. His company, PC Productivity Solutions, provides information-management applications to companies across the country. Over the last 25 years, Mike has worked with a wide variety of programming languages, operating systems, and computer hardware, ranging from programming a DEC PDP-8A using the Focal interpreted language to building distributed applications under Visual Studio .NET and Microsoft SharePoint.

Mike was one of the first people outside of Microsoft to see Access in action. He was among a select group of journalists and publishers invited to preview the Access 1.0 beta (then called Cirrus) at the 1992 Windows World Conference in Chicago. Since then, Mike has been involved in every Microsoft Access beta program, both as an insider and as a journalist reporting on the evolution of this fascinating product.

Mike has authored parts of more than 20 different computer books and is a frequent contributor to computer magazines and journals. He has written more than 200 articles and editorials over the last 15 years, mostly for Advisor Media. He has frequently spoken at computer conferences virtually everywhere in the world, and is technical editor and contributor to periodicals and publications produced by Advisor Media.

Mike holds a master's degree in clinical chemistry from the University of Iowa and an MBA from Northeastern University.

Mike can be reached at AccessBible@mikegroh.com. Please prefix the e-mail subject line with "Access Bible:" to get past the spam blocker on this account.

About the Technical Editor

Doug Steele has been working with computers, both mainframe and PC, for almost 40 years. (Yes, he did use punch cards in the beginning!) For over 30 years, Doug has worked for a large international oil company. Databases and data modeling have been his focus for most of that time, although recently he has been working on a desktop project that will roll out Windows 7 to about 100,000 computers worldwide. Doug has authored numerous articles on Access, and has been recognized by Microsoft as an MVP (Most Valuable Professional) for more than ten years.

Doug holds a master's degree in system design engineering from the University of Waterloo, where his research centered around designing user interfaces for nontraditional computer users. This research stemmed from his background in music. (He holds an associateship in piano performance from the Royal Conservatory of Music in Toronto.) Doug can be reached at AccessHelp@rogers.com.

Acknowledgments	xxxiii
Introduction	xxxv

Part I: Access Building Blocks. 1

Chapter 1: An Introduction to Database Development.....	3
Chapter 2: Creating Access Tables	25
Chapter 3: Designing Bulletproof Databases	91
Chapter 4: Selecting Data with Queries.....	129
Chapter 5: Using Operators and Expressions in Access.....	171
Chapter 6: Working with Datasheet View	215
Chapter 7: Creating Basic Access Forms.....	251
Chapter 8: Working with Data on Access Forms.....	289
Chapter 9: Presenting Data with Access Reports	319

Part II: Programming Microsoft Access 375

Chapter 10: VBA Programming Fundamentals.....	377
Chapter 11: Mastering VBA Data Types and Procedures	417
Chapter 12: The Access Event Model.....	451
Chapter 13: Accessing Data with VBA Code	473
Chapter 14: Debugging Your Access Applications.....	523
Chapter 15: Using Access Data Macros	551

Part III: More-Advanced Access Techniques 577

Chapter 16: Working with External Data.....	579
Chapter 17: Importing and Exporting Data.....	609
Chapter 18: Advanced Access Query Techniques	637
Chapter 19: Advanced Access Form Techniques.....	679
Chapter 20: Advanced Access Report Techniques.....	709
Chapter 21: Building Multiuser Applications	751
Chapter 22: Integrating Access with Other Applications.....	789
Chapter 23: Handling Errors and Exceptions.....	819

Part IV: Professional Database Development	839
Chapter 24: Optimizing Access Applications	841
Chapter 25: Advanced Data Access with VBA	881
Chapter 26: Bulletproofing Access Applications	897
Chapter 27: Using the Windows Application Programming Interface	939
Chapter 28: Object-Oriented Programming with VBA	969
Chapter 29: Customizing Access Ribbons	1009
Chapter 30: Using Access Macros	1049
Chapter 31: Distributing Access Applications	1083
Part V: Access and Windows SharePoint Services	1101
Chapter 32: Understanding Windows SharePoint Services	1103
Chapter 33: Integrating Access with SharePoint	1117
Chapter 34: Understanding Access Services	1135
Chapter 35: Deploying Access Applications to SharePoint	1145
Part VI: Access as an Enterprise Platform	1181
Chapter 36: Client/Server Concepts	1183
Chapter 37: SQL Server as an Access Companion	1199
Chapter 38: Upsizing Access Databases to SQL Server	1223
Part VII: Appendixes	1243
Appendix A: Access 2010 Specifications	1245
Appendix B: What's New in Access 2010	1253
Appendix C: What's on the CD-ROM	1267
Index	1271

------------------------------	---------------

Introduction	xxxv
---------------------------	-------------

Part I: Access Building Blocks	1
---------------------------------------	----------

Chapter 1: An Introduction to Database Development	3
---	----------

The Database Terminology of Access	4
Databases	4
Tables	6
Records and fields	8
Values	8
Relational Databases	8
Access Database Objects	10
Datasheets	10
Queries	10
Data-entry and display forms	11
Reports	12
Database objects	12
A Five-Step Design Method	12
Step 1: The overall design — from concept to reality	13
Step 2: Report design	14
Step 3: Data design	16
Step 4: Table design	19
Step 5: Form design	22
Summary	23

Chapter 2: Creating Access Tables	25
--	-----------

Getting Started with Access	25
The Templates section	26
The Office Backstage View	27
Creating a Database	28
The Access 2010 Environment	33
The Navigation Pane	33
The ribbon	36
Other relevant features of the Access environment	37

Contents

Creating a New Table.....	39
Designing tables.....	40
Using the Design tab.....	45
Working with fields.....	47
Creating tblCustomers.....	55
Using AutoNumber fields.....	55
Completing tblCustomers.....	55
Changing a Table Design.....	56
Inserting a new field.....	56
Deleting a field.....	56
Changing a field location.....	57
Changing a field name.....	57
Changing a field size.....	57
Handling data conversion issues.....	57
Assigning field properties.....	58
Understanding tblCustomers Field Properties.....	73
Setting the Primary Key.....	76
Choosing a primary key.....	76
Creating the primary key.....	77
Creating composite primary keys.....	78
Indexing Access Tables.....	78
The importance of indexes.....	80
Multiple-field indexes.....	81
When to index tables.....	83
Printing a Table Design.....	84
Saving the Completed Table.....	85
Manipulating Tables.....	85
Renaming tables.....	86
Deleting tables.....	86
Copying tables in a database.....	86
Copying a table to another database.....	87
Adding Records to a Database Table.....	88
Understanding Attachment Fields.....	88
Summary.....	90
Chapter 3: Designing Bulletproof Databases	91
Building Bulletproof Databases.....	92
Data Normalization.....	94
First normal form.....	95
Second normal form.....	97
Third normal form.....	102
Denormalization.....	102
Table Relationships.....	104
Connecting the data.....	105
One-to-one.....	107

One-to-many.....	108
Many-to-many.....	110
Integrity Rules.....	112
No primary key can contain a null value	113
All foreign key values must be matched by corresponding primary keys	114
Keys.....	114
Deciding on a primary key	115
The benefits of a primary key	117
Designating a primary key	118
Creating relationships and enforcing referential integrity.....	119
Viewing all relationships	125
Deleting relationships.....	126
Application-specific integrity rules	126
Summary	127
Chapter 4: Selecting Data with Queries	129
Introducing Queries.....	130
What queries are	130
Types of queries	133
What queries can do	134
What queries return	134
Creating a Query.....	135
Adding Fields.....	138
Adding a single field.....	138
Adding multiple fields.....	139
Displaying the Recordset.....	140
Working with Fields	141
Selecting a field in the QBE grid.....	142
Changing field order	142
Resizing columns in the QBE grid	143
Removing a field	144
Inserting a field	144
Providing an alias for the field name	144
Showing a field.....	145
Changing the Sort Order.....	147
Displaying Only Selected Records.....	149
Understanding selection criteria	149
Entering simple string criteria	150
Entering other simple criteria	151
Printing a Query's Recordset	153
Saving a Query.....	153
Creating Multi-Table Queries.....	153
Viewing table names.....	155
Adding multiple fields.....	156
Multi-table query limitations	156
Overcoming query limitations.....	157

Contents

Working with the Table Pane.....	158
Looking at the join line	158
Manipulating Field Lists	159
Moving a table.....	159
Removing a table.....	159
Adding more tables	160
Creating and Working with Query Joins	160
Using ad hoc table joins	161
Specifying the type of join	162
Deleting joins	164
Understanding Table Join Types	165
Working with inner joins (equi-joins)	165
Understanding outer joins.....	166
Working with self-joins.....	167
Creating a Cartesian product.....	169
Summary	170

Chapter 5: Using Operators and Expressions in Access 171

Introducing Operators	171
Looking at the types of operators	172
Operator precedence	185
Using Operators and Expressions in Queries.....	187
Using query comparison operators.....	188
Understanding complex criteria	189
Using functions in select queries	192
Referencing fields in select queries	192
Entering Single-Value Field Criteria	193
Entering character (Text or Memo) criteria.....	193
The Like operator and wildcards	195
Specifying non-matching values	198
Entering numeric criteria.....	199
Entering true or false criteria	200
Entering OLE object criteria	201
Using Multiple Criteria in a Query	201
Understanding an Or operation.....	201
Specifying multiple values with the Or operator.....	202
Using the Or cell of the QBE pane.....	202
Using a list of values with the In operator	203
Using And to specify a range	204
Using the Between...And operator	205
Searching for Null data.....	206
Entering Criteria in Multiple Fields.....	208
Using And and Or across fields in a query.....	208
Specifying Or criteria across fields of a query	209

Using And and Or together in different fields	211
A complex query on different lines	212
Summary	213
Chapter 6: Working with Datasheet View.	215
Understanding Datasheets.....	215
Looking at the Datasheet Window	217
Moving within a datasheet.....	218
Using the Navigation buttons.....	218
Examining the Datasheet ribbon	219
Opening a Datasheet.....	221
Entering New Data.....	221
Saving the record	223
Understanding automatic data-type validation	224
Knowing how properties affect data entry	225
Navigating Records in a Datasheet	227
Moving between records	227
Finding a specific value	228
Changing Values in a Datasheet	230
Manually replacing an existing value.....	230
Changing an existing value.....	231
Using the Undo Feature	232
Copying and Pasting Values	232
Replacing Values.....	233
Adding New Records	234
Deleting Records.....	234
Displaying Records	235
Changing the field order	235
Changing the field display width.....	237
Changing the record display height.....	238
Changing display fonts.....	239
Displaying cell gridlines and alternate row colors.....	239
Aligning data in columns.....	241
Hiding and unhiding columns.....	241
Freezing columns.....	242
Saving the changed layout	242
Saving a record.....	242
Sorting and Filtering Records in a Datasheet	242
Sorting your records with QuickSort.....	243
Filtering a selection	243
Filtering by form	246
Focusing on Special Features of Datasheets.....	247
Printing Records	248
Printing the datasheet.....	249
Using the Print Preview window	249
Summary	249

Contents

Chapter 7: Creating Basic Access Forms 251

Formulating Forms	252
Creating a new form.....	253
Looking at special types of forms	257
Resizing the form area	263
Saving your form.....	263
Working with Controls	264
Categorizing controls	264
Adding a control	266
Selecting and deselecting controls	271
Manipulating controls	272
Introducing Properties	282
Displaying the Property Sheet	282
Getting acquainted with the Property Sheet.....	283
Changing a control's property setting.....	284
Naming control labels and their captions	285
Summary	287

Chapter 8: Working with Data on Access Forms 289

Using Form View	289
Looking at the Home ribbon tab	291
Navigating among fields	294
Moving among records in a form.....	294
Changing Values in a Form	295
Knowing which controls you can't edit	296
Working with pictures and OLE objects.....	296
Entering data in the Memo field	297
Entering data in the Date field.....	298
Using option groups.....	298
Using combo boxes and list boxes.....	299
Switching to Datasheet view.....	300
Saving a record.....	300
Printing a Form.....	300
Working with Form Properties	301
Changing the title bar text with the Caption property	303
Creating a bound form	304
Specifying how to view the form	304
Removing the Record Selector	305
Looking at other form properties.....	305
Adding a Form Header or Footer	311
Changing the Layout	312
Changing a control's properties.....	312
Setting the Tab Order.....	313
Aligning controls.....	314
Modifying the format of text in a control.....	314
Using the Field List to add controls.....	314

Creating a Calculated Control	316
Converting a Form to a Report.....	317
Summary	317
Chapter 9: Presenting Data with Access Reports	319
Introducing Reports	319
Identifying the different types of reports.....	320
Distinguishing between reports and forms	322
Creating a Report, from Beginning to End.....	323
Defining the report layout	323
Assembling the data	324
Creating a report with the Report Wizard.....	324
Printing or viewing the report	338
Saving the report.....	340
Banded Report Design Concepts	340
The Report Header section	343
The Page Header section	343
The Group Header section	343
The Detail section.....	344
The Group Footer section	344
The Page Footer section	344
The Report Footer section	345
Creating a Report from Scratch	345
Creating a new report and binding it to a query	347
Defining the report page size and layout	348
Placing controls on the report	350
Resizing a section	351
Working with text boxes	352
Changing label and text-box control properties.....	359
Growing and shrinking text-box controls	360
Sorting and grouping data	361
Sorting data within groups	363
Adding page breaks.....	366
Improving the Report's Appearance	367
Adjusting the page header	368
Creating an expression in the group header	369
Enhancing the Detail section	370
Creating a report header.....	371
Summary	373
Part II: Programming Microsoft Access	375
Chapter 10: VBA Programming Fundamentals	377
Introducing Visual Basic for Applications.....	378
Understanding VBA Terminology.....	379
Starting with VBA Code Basics	380

Contents

Migrating from Macros to VBA.....	381
Knowing when to use macros and when to use VBA	382
Converting your existing macros to VBA	382
Using the Command Button Wizard	385
Creating VBA Programs.....	386
Events and event procedures.....	387
Modules	389
Understanding VBA Branching Constructs.....	401
Branching.....	401
Looping.....	404
Working with Objects and Collections.....	406
An object primer	406
The With statement.....	408
The For Each statement.....	409
Looking at Access Options for Developers	410
The Editor tab of the Options dialog box	410
The Project Properties dialog box	412
Command-line arguments.....	414
Summary	416
Chapter 11: Mastering VBA Data Types and Procedures.	417
Introducing the Access VBA Editor	418
Using Variables	421
Naming variables.....	422
Declaring variables.....	423
Working with Data Types	427
Comparing implicit and explicit variables	430
Forcing explicit declaration.....	431
Using a naming convention.....	431
Understanding variable scope and lifetime	432
Understanding Subs and Functions.....	435
Understanding where to create a procedure	436
Calling VBA procedures	437
Creating subs	437
Creating Functions.....	441
Handling parameters	442
Calling a function and passing parameters	443
Creating a function to calculate sales tax	445
Simplifying Code with Named Arguments	447
Summary	449
Chapter 12: The Access Event Model	451
Programming Events.....	452
Understanding how events trigger VBA code.....	452
Creating event procedures.....	453

Identifying Common Events	454
Form event procedures	456
Control event procedures	459
Report event procedures	460
Report section event procedures	462
Paying Attention to Event Sequence	465
Looking at common event sequences	465
Writing simple form and control event procedures	466
Summary	471
Chapter 13: Accessing Data with VBA Code	473
Understanding SQL	473
Viewing SQL statements in queries	474
A SQL primer	475
Working with Data	485
Understanding ADO Objects	488
The ADO Connection object	489
The ADO Command object	492
The ADO Recordset object	494
Understanding DAO Objects	499
The DAO DBEngine object	501
The DAO Workspace object	501
The DAO Database object	502
The DAO TableDef object	502
The DAO QueryDef object	503
The DAO Recordset object	505
The DAO Field objects (recordsets)	506
Writing VBA Code to Update a Table	508
Updating fields in a record using ADO	509
Updating a calculated control	513
Adding a new record	517
Deleting a record	517
Deleting related records in multiple tables	518
Summary	521
Chapter 14: Debugging Your Access Applications	523
Testing Your Applications	524
Using the Module Options	525
Auto Syntax Check	525
Require Variable Declaration	527
Auto List Members	528
Auto Quick Info	528
Auto Data Tips	529
Break on All Errors	529
Compile on Demand	530

Contents

Organizing VBA Code	530
Compiling VBA Code	532
Traditional Debugging Techniques	534
Using MsgBox	534
Using Debug.Print	537
Using the Access Debugging Tools	538
Running code with the Immediate window	538
Suspending execution with breakpoints	539
Looking at variables with the Locals window	544
Setting watches with the Watches window	545
Using conditional watches	547
Using the Call Stack window	548
Summary	549
Chapter 15: Using Access Data Macros.	551
Introducing Data Macros	551
Looking at How Data Macros Are Created	553
Using the Macro Designer	553
Using the Action Catalog	557
Discovering Table Events	562
Before events	562
After events	564
Building Macros	566
Adding macro items	566
Manipulating macro items	569
Moving macro items	572
Collapsing macro items	573
Saving a macro as XML	574
Recognizing the Limitations of Data Macros	575
Summary	576
Part III: More-Advanced Access Techniques	577
Chapter 16: Working with External Data.	579
Looking at How Access Works with External Data	580
Types of external data	580
Ways of working with external data	581
Linking External Data	584
Linking to external database tables	585
Limitations of linked data	587
Linking to other Access database tables	588
Linking to ODBC data sources	590
Linking to xBase files	591
Linking to non-database data	591

Working with Linked Tables.....	597
Setting view properties.....	598
Setting relationships.....	598
Optimizing linked tables.....	598
Deleting a linked table reference.....	599
Viewing or changing information for linked tables.....	599
Using Code to Link Tables in Access.....	600
The Connect and SourceTableName properties.....	600
Checking links.....	606
Summary.....	608
Chapter 17: Importing and Exporting Data.....	609
Looking at Your Options for Importing and Exporting.....	609
Importing External Data.....	611
Importing from another Access database.....	611
Importing from an Excel spreadsheet.....	614
Importing a SharePoint list.....	618
Importing data from text files.....	618
Importing an XML document.....	623
Importing an HTML document.....	627
Importing Access objects other than tables.....	628
Importing an Outlook folder.....	630
Importing dBase tables.....	631
Troubleshooting import errors.....	633
Exporting to External Formats.....	634
Exporting objects to other Access databases.....	634
Exporting through ODBC drivers.....	635
Functionality exclusive to exports.....	636
Summary.....	636
Chapter 18: Advanced Access Query Techniques.....	637
Using Calculated Fields.....	638
Calculated Fields and the Expression Builder.....	640
Counting Records in a Table or Query.....	642
Finding the Top (n) Records in a Query.....	644
How Queries Save Field Selections.....	646
Hiding (not showing) fields.....	647
Renaming fields in queries.....	647
Query Design Options.....	649
Setting Query Properties.....	651
Creating Queries That Calculate Totals.....	653
Showing and hiding the Total row in the QBE pane.....	654
The Total row options.....	654
Performing totals on all records.....	657
Performing totals on groups of records.....	659

Contents

Specifying criteria for a total query	662
Creating expressions for totals	664
Creating Crosstab Queries	666
Understanding the crosstab query	666
Creating the crosstab query	667
Understanding Action Queries	671
Types of action queries	671
Creating action queries	671
Troubleshooting action queries	676
Summary	677

Chapter 19: Advanced Access Form Techniques 679

Setting Control Properties	679
Customizing default properties	681
Manipulating controls at runtime	682
Reading control properties	685
Working with Subforms	686
Designing Forms	688
Using the Tab Stop property	688
Tallying check boxes	688
Adding animation	688
Using SQL for a faster refresh	690
Selecting data for overtyping	690
Toggling properties with Not	690
Creating an auto-closing form	691
Setting up combo boxes and list boxes	691
Determining whether a form is open	693
Tackling Advanced Forms Techniques	694
Using the Page Number and Date/Time controls	694
Using the Image control	695
Morphing a control	695
Using the Format Painter	696
Offering more end-user help	697
Adding background pictures	697
Fine-tuning your form's behavior with form events	699
Using the Tab Control	700
Using Dialog Boxes to Collect Information	703
Composing the SQL statement	704
Adding a default button	706
Setting a Cancel button	706
Removing the control menu	706
Closing the form	707
Summary	707

Chapter 20: Advanced Access Report Techniques 709

Grouping and Sorting Data	710
Grouping data alphabetically.....	710
Grouping on date intervals.....	714
Hiding repeating information.....	716
Hiding a page header	719
Starting a new page number for each group	719
Formatting Data.....	720
Creating numbered lists	720
Adding bullet characters.....	723
Adding emphasis at runtime.....	725
Avoiding empty reports.....	728
Avoiding null values in a tabular report.....	728
Inserting vertical lines between columns	729
Adding a blank line every <i>n</i> records	731
Even-odd page printing.....	733
Using different formats in the same text box	735
Centering the title	736
Easily aligning control labels	736
Micro-adjusting controls	736
Adding Data.....	737
Adding more information to a report	737
Adding the user's name to a bound report.....	738
Trying More Techniques	739
Displaying all reports in a combo box	739
Fast printing from queried data.....	740
Hiding forms during Print Preview.....	741
Using snaking columns in a report	741
Exploiting two-pass report processing.....	747
Assigning unique names to controls	749
Summary	750

Chapter 21: Building Multiuser Applications 751

Working on a Network	752
Network performance	752
File location	753
Data sources.....	754
Considering the Options for Opening a Database.....	756
Splitting a Database for Network Access.....	759
Detailing the benefits of splitting a database	759
Knowing where to put which objects	761
Using the Database Splitter add-in	762
Finding the Key to Locking Issues.....	764
Access's built-in record-locking features.....	765
Record-lock error handling	768

Contents

Reducing Multiuser Errors with Unbound Forms.....	780
Creating an unbound form.....	781
Making an unbound form work	781
Summary	788
Chapter 22: Integrating Access with Other Applications	789
Using Automation in Access.....	790
Understanding how Automation works.....	790
Creating Automation references	791
Binding your VBA object variables to objects in the Automation interface	792
Creating an instance of an Automation object	795
Getting an existing object instance	797
Working with Automation objects	799
Closing an instance of an Automation object.....	800
Looking at an Automation Example Using Word	800
Creating an instance of a Word object.....	805
Making the instance of Word visible	805
Creating a new document based on an existing template.....	806
Inserting data	806
Activating the instance of Word	806
Moving the cursor in Word.....	807
Discarding the Word object instance.....	807
Inserting pictures by using bookmarks.....	807
Using Office's macro recorder	808
Collecting Data with Microsoft Outlook.....	811
Creating an e-mail.....	811
Managing replies	815
Summary	818
Chapter 23: Handling Errors and Exceptions.	819
Dealing with Errors.....	820
Logical errors	820
Runtime errors	821
Identifying Which Errors Can Be Detected.....	824
What an error handler is	824
How to set a basic error trap	825
Trapping Errors with VBA.....	826
The Err object	827
VBA error-handling statements.....	829
The Error event	836
The ADO Errors collection.....	837
Summary	838

Part IV: Professional Database Development 839

Chapter 24: Optimizing Access Applications 841

Understanding Module Load on Demand	841
Organizing your modules.....	842
Pruning the call tree	842
Using the .accdb Database File Format.....	844
Distributing .accdc Files.....	846
Understanding the Compiled State.....	848
Putting your application's code into a compiled state	849
Losing the compiled state.....	850
Distributing applications in a compiled or uncompiled state	851
Improving Absolute Speed	854
Tuning your system.....	856
Getting the most from your tables	856
Getting the most from your queries.....	858
Getting the most from your forms and reports	859
Getting the most from your modules.....	862
Increasing network performance	866
Improving Perceived Speed.....	867
Using a splash screen	867
Loading and keeping forms hidden	868
Using the hourglass.....	868
Using the built-in progress meter	869
Creating a progress meter as a pop-up form	870
Speeding up the progress meter display	872
Working with Large Access Databases.....	872
Understanding how databases grow in size	873
Recognizing that compiling and compacting may not be enough	874
Using the decompile option	876
Detecting an uncompiled database and automatically recompiling.....	877
Making small changes to large databases	879
Summary	879

Chapter 25: Advanced Data Access with VBA 881

Adding an Unbound Combo Box to a Form to Find Data	881
Using the FindRecord method.....	883
Using a bookmark.....	885
Filtering a Form	888
With code	888
With a query	889
Summary	895

Chapter 26: Bulletproofing Access Applications 897

Introducing Bulletproofing.....	898
Looking at the Characteristics of Bulletproofed Applications.....	898
Identifying the Principles of Bulletproofing.....	899
Building to a specification	900
Becoming one with documentation	902
Considering your users	903
Getting the application to the users	905
Enabling the users to actually use the application.....	907
Controlling the flow of information.....	912
Keeping the user informed	915
Tracking down problems	919
Securing the environment	923
Protecting your database	927
Continuing to improve the product.....	938
Summary	938

Chapter 27: Using the Windows Application Programming Interface. . . 939

What the Windows API Is.....	939
Reasons to Use the Windows API.....	940
Common code base.....	941
Tested and proven code	941
Cross-platform compatibility.....	941
Smaller application footprint.....	941
Application consistency.....	941
DLL Documentation	942
Finding the documentation	942
Making sense of the documentation	942
Recognizing what you can't do with the API.....	945
How to Use the Windows API.....	946
The Declare statement	946
Wrapper functions	949
API Examples.....	950
Retrieving system information	952
Going over general-purpose Windows API functions	960
Manipulating application settings with the Windows API.....	962
Summary	967

Chapter 28: Object-Oriented Programming with VBA 969

Introducing Object-Oriented Programming	970
Getting to know objects	970
Defining objects with class modules.....	972
Looking at a simple class module	973
Adding a class module to a database	974

Creating simple product properties	975
Creating methods	976
Using the product object	978
Creating bulletproof property procedures	980
Recognizing the Benefits of Object-Oriented Programming	981
Encapsulating functionality	982
Simplifying programming tasks	982
Managing a class's interface	983
Using Property Procedures	986
Looking at the types of property procedures	986
Exploring property-value persistence	989
Heeding property procedure rules	990
Modifying the Product Class	991
Retrieving product details	992
Looking at the new ProductID property	993
Adding a new property to provide extra information	994
Adding a new method to the product class	995
Learning about Class Events	997
The Class_Initialize event procedure	997
The Class_Terminate event procedure	998
Adding Events to Class Modules	999
Learning about events in Access	1000
Recognizing the need for events	1000
Creating custom events	1001
Raising events	1002
Trapping custom events	1003
Passing data through events	1004
Exploiting Access class module events	1005
Summary	1008
Chapter 29: Customizing Access Ribbons	1009
Why Replace Toolbars and Menus?	1009
New controls for Access ribbons	1013
SplitButton	1013
DropDown	1014
Gallery	1014
SuperTips	1015
Working with the Access Ribbon	1015
Tabs	1016
Groups	1016
Controls	1017
Managing the ribbon	1017
Working with the Quick Access Toolbar	1018
Editing the Default Access Ribbon	1020

Contents

Developing Custom Access Ribbons.....	1023
The ribbon creation process	1023
Using VBA callbacks.....	1023
The Ribbon Hierarchy.....	1025
Getting Started with Access Ribbons	1026
Step 1: Design the ribbon and build the XML.....	1026
Step 2: Write the callback routines.....	1027
Step 3: Create the USysRibbons table	1029
Step 4: Add XML to USysRibbons	1030
Step 5: Specify the custom ribbon property.....	1032
The Basic Ribbon XML.....	1033
Adding Ribbon Controls	1035
Specifying imageMso.....	1035
The Label control	1037
The Button control.....	1038
Separators	1038
Check boxes.....	1039
The DropDown control.....	1040
The SplitButton Control	1041
Using Visual Web Developer.....	1042
Managing Ribbons	1045
Completely Removing the Access Ribbon.....	1046
Summary	1047

Chapter 30: Using Access Macros. 1049

An Introduction to Macros.....	1049
Creating a macro	1050
Assigning a macro to an event	1052
Multi-Action Macros	1054
Submacros	1057
Conditions	1061
Opening reports using conditions	1061
Multiple actions in conditions	1064
Temporary Variables	1065
Enhancing a macro you've already created	1065
Using temporary variables to simplify macros	1066
Using temporary variables in VBA	1068
Error Handling and Macro Debugging	1069
The OnError action	1071
The MacroError object	1073
Debugging macros.....	1074
Embedded Macros	1075
Macros versus VBA Statements.....	1077
Choosing between macros and VBA	1078
Converting existing macros to VBA	1078
Summary	1081
