# About the Authors

**Alison Barrows** has authored or co-authored books on Windows, the Internet, Microsoft Access, WordPerfect, Lotus 1-2-3, and other topics. In addition to writing books, Alison writes and edits technical documentation and training material. In real life she hangs out with her “guys” — Parker, 6, and Mason, 4, and Evan, 2 — and tries to carve out some time to practice yoga. Alison lives with her family in central Massachusetts.

**Joe Stockman** has been using Microsoft Access since its initial release and has authored or co-authored several books on Access. He’s also developed courseware in Access and VBA and has been on the speaker circuit for Microsoft Access seminars. Joe works as a consultant and software designer for Facilities Survey, Inc. in Pittsburgh, Pennsylvania. He also enjoys music, cooking, and anything else that lets him express his creative side.

**Allen G. Taylor** is a 30-year veteran of the computer industry and the author of over 20 books, including *SQL For Dummies*, *SQL All-in-One For Dummies*, and *Database Development For Dummies*. He lectures nationally on databases, innovation, and entrepreneurship. He also teaches database development through a leading online education provider. Allen is president of Goldfinger Global, LLC and can be reached at [allen@goldfingerglobal.com](mailto:allen@goldfingerglobal.com).

# Dedication

To Matt, Parker, Mason, and Evan. —Alison Barrows

To Mom, as always. —Joseph C. Stockman

To Marguerite Shelton, who gave me my life's greatest gift. —Allen G. Taylor

# Authors'

## Acknowledgments

We would like to acknowledge the care of Kyle Looper, Blair Pottenger, Kathy Simpson, and all the others who shepherded this book through the editing and production process, as well as all the folks listed on the Publisher's Acknowledgments page who worked on this book. (It takes ALL of these people, not just those of us on the cover.) We'd also like to thank the folks at Microsoft for making Access a wonderful tool to create robust database applications.

Alison thanks Dotty, Christy, and Matt for taking great care of my guys so I can get work done. Matt (also known as Honey) gets special thanks as my hardware guru.

Joe thanks his mom and dad, for always encouraging but never pushing. Also thanks to Robin for her support and understanding of the time it took to finish this project.

Allen thanks all the folks at Wiley who made this book possible, but especially Kathy Simpson and Blair Pottenger, project editors, and Kyle Looper, acquisitions editor.

## **Publisher's Acknowledgments**

We're proud of this book; please send us your comments at <http://dummies.custhelp.com>. For other comments, please contact our Customer Care Department within the U.S. at 877-762-2974, outside the U.S. at 317-572-3993, or fax 317-572-4002.

Some of the people who helped bring this book to market include the following:

### ***Acquisitions and Editorial***

**Project Editors:** Kathy Simpson, Blair J. Pottenger

**Acquisitions Editor:** Kyle Looper

**Copy Editor:** Kathy Simpson

**Technical Editor:** Brian Underdahl

**Editorial Manager:** Kevin Kirschner

**Editorial Assistant:** Annie Sullivan

**Sr. Editorial Assistant:** Cherie Case

**Cover Photo:** © Marcello Bortolino / iStockphoto

Composition Services

**Project Coordinator:** Katie Crocker

**Layout and Graphics:** Jennifer Creasey, Joyce Haughey

**Proofreader:** The Well-Chosen Word

**Indexer:** BIM Indexing & Proofreading Services

## **Publishing and Editorial for Technology Dummies**

**Richard Swadley**, Vice President and Executive  
Group Publisher

**Andy Cummings**, Vice President and Publisher

**Mary Bednarek**, Executive Acquisitions Director

**Mary C. Corder**, Editorial Director

## **Publishing for Consumer Dummies**

**Kathleen Nebenhaus**, Vice President and Executive  
Publisher

## **Composition Services**

**Debbie Stailey**, Director of Composition Services

## Table of Contents

### Introduction

[About Access 2013 All-in-One For Dummies](#)

[Foolish Assumptions](#)

[How This Book Is Organized](#)

[Book I: Getting Started with Access 2013](#)

[Book II: Tables for Storing Your Data](#)

[Book III: Queries \(Or Getting Information from Your Data\)](#)

[Book IV: Forms for Editing Data](#)

[Book V: Reporting in Words and Pictures](#)

[Book VI: Automation with Macros](#)

[Book VII: Database Administration](#)

[Book VIII: Programming in VBA](#)

[Book IX: Going Beyond Access](#)

[Appendix: Installing Microsoft Access](#)

[What You Don't Have to Read](#)

[Icons Used in This Book](#)

[Conventions Used in This Book](#)

[Where to Go from Here](#)

## [Book I: Getting Started with Access 2013](#)

### [Book I: Chapter 1: Introducing Access 2013](#)

[Why Use a Database?](#)

[Plan, Plan, Plan](#)

[The Six Types of Access Objects](#)

[Tables for storing your data](#)

[Queries for selecting your data](#)

[Forms for editing and displaying your data](#)

[Reports for printing your data](#)

[Macros for saving keystrokes](#)

[Modules for writing your own programs](#)

[Essential Database Concepts](#)

### [Book I: Chapter 2: Getting Started, Getting Around](#)

[Running Access](#)

[Opening a Database](#)

[Opening oldies](#)

[Saving in a different version](#)

[I have that open already!](#)

[Creating a sample database from a template](#)

[Making Friends with the Access Window](#)

[The Ribbon](#)

[The Quick Access toolbar](#)

[Introducing Mission Control: The Navigation Pane](#)

[Choosing how database objects are grouped](#)

[Choosing size and details for Navigation Pane objects](#)

[Sorting objects in the Navigation Pane](#)

[Searching for an object](#)

[Viewing Objects in Your Database](#)

[Viewing lots of objects at the same time](#)

[Switching views](#)

[Creating, Deleting, Renaming, Copying, and Printing Objects](#)

[Introducing Backstage View](#)

[Using Wizards](#)

[Getting Help](#)

[Saving Time with Keyboard Shortcuts](#)

## [Book I: Chapter 3: Designing Your Database the Relational Way](#)

[What Are Tables, Fields, and Keys?](#)

[Data types](#)

[Primary key fields for your tables](#)

[What Are Relationships?](#)

[How relationships work](#)

[One-to-many relationships](#)

[One-to-one relationships](#)

[Many-to-many relationships](#)

[Designing a Database](#)

[Identifying your data](#)

[Eliminating redundant fields](#)

[Organizing fields into tables](#)

[Adding tables for codes and abbreviations](#)

[Choosing primary keys for each table](#)

[Linking your tables](#)

[Refining your links](#)

[Seeing what's in a name](#)

[Cleaning up the design](#)

[Choosing Field Types](#)

[Choosing between Text and Yes/No fields](#)

[Choosing between Short Text and Long Text fields](#)

[Choosing between Text and Number \(or Currency\) fields](#)

[Storing pictures and other files](#)

[Storing names, money, codes, and other stuff](#)

[Storing Single Facts](#)

[Creating a Database](#)

[Creating a database from scratch](#)

[Creating a new database from a template](#)

## [Book II: Tables for Storing Your Data](#)

### [Book II: Chapter 1: Creating and Modifying Tables](#)

[Viewing Your Tables](#)

[Creating the First Table for Your Data](#)

[Creating a new table using Datasheet view](#)

[Entering data and creating fields](#)

[Choosing field names](#)

[Changing a field name](#)

[Saving your table](#)

[Working with Tables and Fields in Your Database](#)

[Finding other ways to create a table](#)

[Starting with table templates \(aka Application Parts\)](#)

[Creating Fields](#)

[Creating fields by clicking a button](#)

[Quick-starting your table with field templates](#)

[Working with a Datasheet Full of Data](#)

[Looking at a datasheet](#)

[Navigating the data](#)

[Adding and Editing Records](#)

[Using keystrokes to enter data automatically](#)

[Editing the data you have](#)

[Adding calculated fields to tables](#)

[Entering and editing hyperlinks](#)

[Using the Attachment data type](#)

[Deleting records](#)

[Entering special characters](#)

[Checking Your Spelling](#)

[Using AutoCorrect for Faster Data Entry](#)

[Formatting a Datasheet](#)

[Formatting a field](#)

[Changing the font](#)

[Taking advantage of Rich Text](#)

[Changing gridlines and background color](#)

[Rearranging columns in a datasheet](#)

[Changing column width](#)

[Changing row height](#)

[Inserting and deleting columns](#)

[Hiding columns](#)

[Freezing columns](#)

[Changing default formatting for new tables](#)

[Taking Advantage of Subdatasheets](#)

[Adding a Total Row to the Datasheet](#)

## [Book II: Chapter 2: Refining Your Table in Design View](#)

[Creating Tables in Design View](#)

[Refining Your Table in Design View](#)

[Using the Caption property](#)

[Adding a field](#)

[Copying a field](#)

[Moving a field](#)

[Deleting a field](#)

[Choosing a data type](#)

[Formatting Fields with Field Properties](#)

[Formatting Number and Currency fields](#)

[Setting the field size](#)

[Formatting Date/Time fields](#)

[Formatting Text fields](#)

[Defining the Primary Key](#)

[Indexing Fields](#)

[Printing Table Designs](#)

## [Book II: Chapter 3: Sorting, Finding, and Filtering Data in a Datasheet](#)

[Sorting the Rows of a Datasheet](#)

[Finding \(and Replacing\) Data](#)

[Exploring the Find and Replace dialog box](#)

[Replacing the data you find](#)

[Filtering a Datasheet](#)

[Understanding filtering basics](#)

[Using different types of datasheet filters](#)

[Filtering with quick filters](#)

[Filtering by selection](#)

[Filtering multiple fields](#)

[Filtering with Advanced Filter/Sort](#)

## [Book II: Chapter 4: Importing and Exporting Data](#)

[Cutting, Copying, and Pasting](#)

[Using the Office clipboard](#)

[Cutting and pasting small to mediumish amounts of data](#)

[Moving data from Excel to Access](#)

[Importing or Linking to Data](#)

[Making data available](#)

[Understanding what applications are compatible with Access](#)

[Getting external data](#)

[Importing text or spreadsheet data](#)

[Importing with the Import Spreadsheet and Link Spreadsheet wizards](#)

[Getting contacts from Outlook into Access](#)

[Managing links](#)

[Cleaning up your imported data](#)

[Running and scheduling saved imports](#)

[Getting Data from Another Access Database](#)

[Getting Data Out of Access](#)

[Using Access Data in a Word Mail Merge](#)

## [Book II: Chapter 5: Avoiding “Garbage In, Garbage Out”](#)

[Finding the Right Tool to Keep Garbage Out](#)

[Using Input Masks to Validate and Format Data](#)

[Using the Input Mask Wizard](#)

[Creating an input mask manually](#)

[Creating a Lookup Field](#)

[Using the Lookup Wizard](#)

[Knowing when to allow multiple selections](#)

[Modifying the lookup list](#)

[Validating Data As It’s Entered](#)

## [Book II: Chapter 6: Relating Your Tables and Protecting Your Data](#)

[Creating Relationships and Protecting Your Data with Referential Integrity](#)

[Deciding on the best path to take](#)

[Opening the Relationships window](#)

[Adding tables to the Relationships window](#)

[Setting referential integrity between two tables](#)

[Editing and deleting relationships](#)

[Creating Referential Integrity with Many-to-Many Relationships](#)

[Printing the Relationships Window](#)

## [Book III: Queries \(Or Getting Information from Your Data\)](#)

### [Book III: Chapter 1: Creating Select Queries](#)

[Understanding Types of Queries](#)

[Creating a Query in Design View](#)

[Creating a Query with the Simple Query Wizard](#)

[Viewing Your Query](#)

[Using Query Design View](#)

[Deciphering Design view](#)

[Working with tables in Design view](#)

[Introducing the query design grid](#)

[Navigating Design view](#)

[Displaying or hiding table names](#)

[Taking Tips on Creating a Query](#)

[Adding tables to the query](#)

[Inserting fields into a design grid](#)

[Editing a Query](#)

[Sorting a query](#)

[Viewing top values](#)

[Hiding fields](#)

[Changing the format of a query field](#)

## Limiting Records with Criteria Expressions

Querying by example

Using dates, times, text, and values in criteria

Using operators in criteria expressions

Using multiple criteria

Using lookup fields in criteria

Creating queries with multivalue lookup fields

## Working with Multiple Related Tables

Joining tables in Design view

Choosing the type of join and setting join properties

## Working with Query Datasheets

Using the query datasheet to edit data

Creating AutoLookup queries to fill in data automatically

## Saving Queries

# Book III: Chapter 2: Letting Queries Do the Math

## Doing Calculations in Queries

## Writing Expressions in Access

Using operators in expressions

Using field names in expressions

Using functions in expressions

## Using Expression Builder

Getting help with functions

Entering text in < and > brackets

Nesting functions

## Going beyond Basic Arithmetic

[Formatting calculated numbers in queries](#)

[Avoiding problems with null values](#)

[Performing Date and Time Calculations](#)

[Using literal dates and times in expressions](#)

[Using the Date/Time functions](#)

[Manipulating Text with Expressions](#)

[Adding spaces to text expressions](#)

[Using the Access Text functions](#)

[Writing Decision-Making Expressions](#)

[Making comparisons in IIf\(\)](#)

[Combining comparisons](#)

[To tax or not to tax?](#)

[Testing for Empty Fields](#)

[Sorting by Name or Company](#)

[Creating Flexible Parameter Queries](#)

[Working with Totals, Subtotals, Averages, and Such](#)

[Calculating subtotals in a query](#)

[Filtering records based on calculated fields](#)

## [Book III: Chapter 3: Doing Neat Things with Action Queries and Query Wizards](#)

[Creating Action Queries](#)

[Recognizing the dangers of the Run button](#)

[Creating action queries safely](#)

[Changing Data with Update Queries](#)

[Creating New Tables with Make-Table Queries](#)

[Moving Data from One Table to Another with Append Queries](#)

[Deleting Lots of Records with Delete Queries](#)

[Finding Unmatched Records with a Wizard](#)

[Finding Duplicate Records](#)

## [Book III: Chapter 4: Viewing Your Data from All Angles Using Crosstabs](#)

[Aggregating Data in a Crosstab Query](#)

[Using the Crosstab Query Wizard](#)

[Creating a Crosstab Query in Design View](#)

[Modifying a Crosstab Query](#)

[Using criteria](#)

[Using multiple fields for row headings](#)

[Adding aggregate columns](#)

[Getting data in order](#)

## [Book IV: Forms for Editing Data](#)

### [Book IV: Chapter 1: Designing Custom Forms \(and Reports\)](#)

[Seeing How Forms and Reports Are Secretly Related](#)

[Understanding Form Basics](#)

[Making and Using a Form](#)

[Making the easiest possible form with the Form button](#)

[Viewing a form](#)

[Editing data in Form view](#)

[Creating Forms with Wizards](#)

[Wizard, make me a form!](#)

[More super-speedy forms](#)

[Modifying Existing Forms and Reports](#)

[Getting Your Fields Lined Up in Layout View](#)

[Using a control layout to rearrange fields](#)

[Adding and deleting fields](#)

[Making a new form from scratch in Layout view](#)

[Adding and deleting rows and columns in the control layout](#)

[Controlling your control layouts](#)

[Trying out your new, improved form](#)

[Configuring the Whole Form or Report](#)

[Naming the form](#)

[Seeing where records come from](#)

[Deciding the order of the records](#)

[Choosing one record or many](#)

[Using some other cool form properties](#)

[Applying a theme to a form or report](#)

[Storing Your Forms and Reports](#)

[Managing forms and reports](#)

[Importing forms and reports from other databases](#)

[Printing forms](#)

## [Book IV: Chapter 2: Jazzing Up Your Forms \(and Reports\)](#)

[Creating New Forms Efficiently](#)

[Making All Kinds of Changes in Design View](#)

[Changing the layout of an existing form or report](#)

[Changing the size of a form](#)

## Taking Control of Your Form or Report

Understanding types of form controls

Making a new control by dragging a field

Making a new control by choosing a control

Setting control properties

Binding a control to data in the record source

## Making Controls That Display Text, Numbers, and Dates

Making and editing labels

Adding hyperlink controls

Putting Short Text and Long Text fields in text boxes

Displaying Number, Currency, and Date fields

## Breaking Out of the Control Layout

Removing the control layout

Moving or resizing a control

Neatening your controls

## Renaming, Resizing, Deleting, and Copying Controls

## Formatting Numbers and Dates

## Choosing Fonts, Colors, and Other Decorative Touches

Copying your formatting

Making bad news red

## Creating Check Boxes for Yes/No Fields

## Adding Lines, Boxes, and Backgrounds

## Controlling Cursor Movement in Your Form

# Book IV: Chapter 3: Creating Smarter Forms

## Creating and Configuring Combo and List Boxes

[Making combo boxes the really easy way](#)

[Running the Combo Box and List Box wizards](#)

[Changing the properties of a combo or list box](#)

[Designing Cool Looks for Yes/No Fields](#)

[Creating Option Groups](#)

[Creating Command Buttons](#)

[Making a Close button](#)

[Making a button to display a related form](#)

[Making a button to print the current record](#)

[Making other cool buttons](#)

[Customizing your command button](#)

[Making a Find Box](#)

[Displaying Attachments](#)

[Adding Form Headers and Footers](#)

[Creating Tabbed Forms](#)

[You Can't Type That Here!](#)

[Making a Main Menu for Your Database](#)

[Creating a navigation form](#)

[Finding an alternative to navigation forms](#)

[Opening a form automatically when the database opens](#)

## [Book IV: Chapter 4: Doing Calculations in Forms and Subforms \(and Reports\)](#)

[Doing Elementary Calculations](#)

[Making a calculated control](#)

[Checking your expression](#)

[Troubleshooting expressions](#)

[Calculating and Formatting Numbers](#)

[Calculating and Formatting Dates](#)

[Calculating and Formatting Text](#)

[Displaying Values That Depend on Conditions](#)

[Formatting Calculated Controls](#)

[Using a Split Form to Display a Datasheet](#)

[Using a Subform to Display Detail Records](#)

[Creating a subform](#)

[Viewing the properties of subform controls](#)

[Adding Subtotals and Totals from Subforms](#)

[Using aggregate functions](#)

[Referring to a control on a subform](#)

[Creating the controls to total a subform](#)

## [Book V: Reporting in Words and Pictures](#)

### [Book V: Chapter 1: Creating and Spiffing Up Reports](#)

[Knowing Forms Means That You Already Know Reports](#)

[Creating Reports Automatically](#)

[Making the easiest possible report](#)

[Running the Report Wizard](#)

[Editing Reports in Layout and Design View](#)

[Creating and Managing Report Sections](#)

[Setting report and section properties](#)

[Adding page headers, footers, and numbers](#)

[Grouping your records](#)

[Sorting the records in your report](#)

[Calculating group subtotals and report totals](#)

[Employing Formatting Tips and Tricks](#)

[Copying Forms to Reports](#)

[Adding and Formatting Subreports](#)

[Making a subreport](#)

[Printing information from a subreport on the main report](#)

[Displaying Empty or Long Fields](#)

[Displaying long text](#)

[Displaying fields that may be empty](#)

[Viewing Your Reports Onscreen](#)

## [Book V: Chapter 2: Printing Beautiful Reports](#)

[Viewing Your Report](#)

[Adjusting the view](#)

[Looking at lots of pages](#)

[Formatting the Page](#)

[Selecting a printer](#)

[Setting margins, paper size, and paper orientation](#)

[Controlling page breaks](#)

[Avoiding blank pages](#)

[Printing only the data](#)

[Printing the Report](#)

[Printing on an actual printer](#)

[Creating a PDF, XPS, HTML, or other file of your report](#)

[Creating Mailing Labels](#)

[Running the Label Wizard](#)

[Behind the scenes in a mailing-label report](#)

[Changing the page setup for labels](#)

[Sending a Report to Another Application](#)

[Exporting your report to Microsoft Excel](#)

[Exporting your report to Microsoft Word](#)

[E-mailing your report in Microsoft Outlook](#)

[Exporting your report in other formats](#)

[Automating your exports](#)

## [Book V: Chapter 3: Creating Charts and Graphs from Your Data](#)

[Pulling Up a Seat at the Data Bar](#)

[Displaying Information with Charts](#)

[Creating charts with the Chart Wizard](#)

[Making bar charts](#)

[Making line and area charts](#)

[Making pie and doughnut charts](#)

[Making bubble and XY scatter plots](#)

[Changing Your Charts](#)

[Modifying an existing chart](#)

[Formatting charts with colors, legends, and titles](#)

[Changing how data is graphed](#)

[Changing which data is charted](#)

## [Book VI: Automation with Macros](#)

## Book VI: Chapter 1: Making Macros Do the Work

[Introducing Macros](#)

[Creating and Editing Stand-Alone Macros](#)

[Naming, saving, and editing macros](#)

[Taking action](#)

[Specifying arguments to actions](#)

[Moving your actions around](#)

[Adding comments](#)

[Creating subroutines in macros: Submacros](#)

[Running Stand-Alone Macros and Submacros](#)

[Running a macro when the database opens](#)

[Assigning macros to keys](#)

[Opening Databases That Contain Macros](#)

[Keeping a macro from turning into a virus](#)

[Putting your database in a safe place](#)

[Signing your database](#)

[Knowing which actions you can take](#)

[Telling Access to “Run This Only If I Say So”](#)

[If-Then macros](#)

[If-Then-Else macros](#)

## Book VI: Chapter 2: Making Macros Smarter

[Attaching Macros to Tables](#)

[Running data macros](#)

[Creating a data macro](#)

[Trying cool data-macro tricks](#)

## [Running Macros in Forms](#)

[Running a macro when a form event happens](#)

[Creating command buttons on forms](#)

[Referring to form controls in macros](#)

[Printing matching records from a form](#)

## [Changing the Way Your Form Looks Dynamically](#)

[Setting the properties of form controls](#)

[Hiding unneeded controls on a form](#)

## [Setting Up Your Own Main-Menu Form](#)

[Creating a form that appears when the database opens](#)

[Creating command buttons for your main-menu form](#)

## [Using Temporary Variables in Macros](#)

# [Book VII: Database Administration](#)

## [Book VII: Chapter 1: Database Housekeeping](#)

### [Compacting and Repairing Your Database](#)

#### [Making Backups](#)

[Backing up a whole database](#)

[Backing up part of a database](#)

### [Converting Databases](#)

### [Analyzing and Documenting Your Database](#)

[Viewing relationships in the Relationships window](#)

[Viewing object dependencies](#)

[Analyzing database performance](#)

[Documenting your database](#)
