

Making Everything Easier!™

2nd Edition

Ti-84 Plus Graphing Calculator

FOR
DUMMIES®
A Wiley Brand

Learn to:

- Work with all 3 calculators in the TI-84 Plus family
- Use functions for basic arithmetic, graphing and analysis, geometry, and probability
- Create and edit matrices
- Take advantage of new downloadable apps

**Jeff McCalla
C.C. Edwards**

TI-84 Plus Graphing Calculator For Dummies, 2nd Edition [®]

Introduction

[About This Book](#)

[Conventions Used in This Book](#)

[What You're Not to Read](#)

[Foolish Assumptions](#)

[How This Book Is Organized](#)

[Part I: Making Friends with the Calculator](#)

[Part II: Taking Your Calculator Relationship to the Next Level](#)

[Part III: Graphing and Analyzing Functions](#)

[Part IV: Working with Probability and Statistics](#)

[Part V: Doing More with Your Calculator](#)

[Part VI: The Part of Tens](#)

[Icons Used in This Book](#)

[Where to Go from Here](#)

Part I: Making Friends with the Calculator

Chapter 1: Starting with the Basics

[Why Didn't I Think of That?](#)

[Charging the Battery](#)

[Turning the Calculator On and Off](#)

Using the Keyboard

[Accessing the functions in blue](#)

[Using the !\[\]\(c507f772dba2b921f86777f01218e570_img.jpg\) key to write words](#)

[Using the !\[\]\(4729e517bc6a7cd81c8025b9646574fb_img.jpg\) key](#)

[Using the !\[\]\(cbe80b694ebd74fcfe136a095b608235_img.jpg\) key](#)

[Using the arrow keys](#)

[Keys to remember](#)

What Is the Home Screen?

The Busy Indicator

Editing Entries

Copying and Pasting

Using Menus

[Accessing a menu](#)

[Scrolling a menu](#)

[Selecting menu items](#)

Setting the Mode

[MathPrint mode versus Classic mode](#)

Using the Catalog

Chapter 2: Doing Basic Arithmetic

[Entering and Evaluating Expressions](#)

[Using Exponents and Roots](#)

[Working in Scientific Notation](#)

[Getting Familiar with Important Keys](#)

[Following the Order of Operations](#)

[Using the Previous Answer](#)

[Storing Variables](#)

[Combining Expressions](#)

Chapter 3: Dealing with Fractions

[Setting the Mode](#)

[Converting Fractions and Decimals](#)

[Accessing Shortcut Menus](#)

[Entering Fractions and Mixed Numbers](#)

[Entering Complex Numbers in Fractions](#)

[Entering Complex Fractions](#)

Chapter 4: Solving Equations

[Using the Equation Solver](#)

[Step 1: Enter or edit the equation to be solved](#)

[Step 2: Guess a solution](#)

[Step 3: Solve the equation](#)

[Assigning Values to Variables](#)

[Finding Multiple Solutions](#)

[Making strategic guesses](#)

[Defining the solution bounds](#)

[Using the Solve Function](#)

[Discovering the PlySmlt2 App](#)

[Finding the roots of a polynomial](#)

[Solving systems of equations](#)

[Part II: Taking Your Calculator Relationship to the Next Level](#)

[Chapter 5: Working with Complex Numbers](#)

[Setting the Mode](#)

[Entering Complex Numbers](#)

[Interpreting Strange-looking Results](#)

[Using the CMPLX menu](#)

[Finding the conjugate of a complex number](#)

[Finding the real and imaginary parts of a complex number](#)

[Finding the polar angle of a complex number](#)

[Finding the magnitude \(modulus\) of a complex number](#)

[Displaying a complex result in polar or rectangular form](#)

[Chapter 6: Understanding the Math Menu and Submenus](#)

[Getting to Know the Math Menu and Submenus](#)

[Accessing Catalog Help from the Math Menu](#)

[The Math MATH Submenu](#)

[Converting between decimals and fractions](#)

[Cubing and taking cube roots](#)

[Taking the xth root](#)

[Finding the location of maximum and minimum values](#)

[Using numerical differentiation and integration templates](#)

[Using summation and logarithm templates](#)

[The Math NUM Submenu](#)

[Finding the absolute value](#)

[Rounding numbers](#)

[Finding the integer and fractional parts of a value](#)
[Using the greatest-integer function](#)
[Finding minimum and maximum values in a list of numbers](#)
[Finding the least common multiple and greatest common divisor](#)
[Finding the remainder](#)

Chapter 7: The Angle and Test Menus

The Angle Menu

[Converting degrees to radians](#)
[Converting radians to degrees](#)
[Converting between degrees and DMS](#)
[Entering angles in DMS measure](#)
[Overriding the mode of the angle](#)
[Converting rectangular and polar coordinates](#)

The Test Menu

[Understanding Boolean logic](#)
[Comparing numbers](#)
[Testing equivalent expressions](#)
[Using Logic commands](#)

Chapter 8: Creating and Editing Matrices

[Entering Matrices](#)
[Storing a Matrix](#)
[Matrix Arithmetic](#)
[Evaluating the Determinant and Other Matrix Operations](#)
[Solving a System of Equations](#)
[A⁻¹*B method](#)
[Augmenting matrices method](#)

Part III: Graphing and Analyzing Functions

Chapter 9: Graphing Functions

[Entering Functions](#)
[Formatting Your Graph](#)
[Graphing Functions](#)
[Turning off Stat Plots \(if necessary\)](#)
[Selecting and deselecting a function](#)
[Adjusting the graph window](#)
[Stopping or pausing your graph](#)
[Adjusting Your Color/Line Settings](#)
[Graphing Families of Functions](#)

[Graphing Piecewise Functions](#)

[Graphing Trig Functions](#)

[Viewing the Function and Graph on the Same Screen](#)

[Saving and Recalling a Graph](#)

Chapter 10: Exploring Functions

[Tracing a Graph](#)

[Changing the TraceStep](#)

[Moving the Trace cursor to any x-value in the graphing window](#)

[Using Zoom Commands](#)

[Storing and recalling your favorite graphing window](#)

[Displaying Functions in a Table](#)

[Automatically generated table](#)

[User-generated table](#)

[Editing a function in a table](#)

[Clearing a Table](#)

[Viewing the Table and the Graph on the Same Screen](#)

Chapter 11: Evaluating Functions

[Finding the Value of a Function](#)

[Using your graph to find the value of a function](#)

[Using your calculator to find the value of a function](#)

[Composing Functions](#)

[Using your graph to compose functions](#)

[Using your calculator to compose functions](#)

[Finding the Zeros of a Function](#)

[Finding Min and Max](#)

[Finding Points of Intersection](#)

[Finding the Slope of a Curve](#)

[Evaluating a Definite Integral](#)

[Graphing Derivative to Find Critical Points](#)

[Solving Equations by Graphing](#)

[Drawing the Inverse of a Function](#)

Chapter 12: Graphing Inequalities

[Graphing One-Variable Inequalities](#)

[Starting Inequality Graphing](#)

[Entering Functions and Inequalities](#)

[Entering inequalities in the Y= editor](#)

[Changing the color of inequalities](#)

[Entering inequalities in the X= editor](#)

[Graphing Inequalities](#)

[Exploring a Graph](#)

[Shading unions and intersections](#)

[Finding the points of intersection](#)

[Other ways to explore a graph](#)

[Storing Data Points](#)

[Clearing the INEQX and INEQY lists](#)

[Storing points in INEQX and INEQY](#)

[Viewing stored data](#)

[Solving Linear Programming Problems](#)

[Quitting Inequality Graphing](#)

[Chapter 13: Graphing Parametric Equations](#)

[Changing the Mode](#)

[Selecting the Graph Style](#)

[Entering Parametric Equations](#)

[Setting the Window](#)

[Graphing Parametric Equations](#)

[Using Zoom to Change the Window](#)

[Using Trace to Evaluate a Parametric Equation](#)

[Viewing the Table of a Parametric Graph](#)

[Taking the Derivative of Parametric Equations](#)

[Chapter 14: Graphing Polar Equations](#)

[Changing the Mode](#)

[Selecting the Graph Style](#)

[Entering Polar Equations](#)

[Setting the Window](#)

[Graphing Polar Equations](#)

[Using Zoom to Change the Window](#)

[Using Trace to Evaluate a Polar Equation](#)

[Viewing the Table of a Polar Graph](#)

[Taking the Derivative of Polar Equations](#)

[Chapter 15: Graphing Sequences](#)

[Changing the Mode](#)
[Selecting the Color](#)
[Entering Sequences](#)
[Setting the Window](#)
[Graphing Sequences](#)
[Using Trace to Evaluate a Sequence Equation](#)
[Viewing the Table of a Sequence Graph](#)
[Graphing a Recursive Sequence](#)
[Graphing the Fibonacci sequence](#)
[Graphing a Web Plot](#)
[Graphing a Phase Plot](#)
[Graphing Partial Sums of an Infinite Series](#)

Part IV: Working with Probability and Statistics

Chapter 16: Probability

[Evaluating Factorials](#)
[Permutations and Combinations](#)
[Using the Binomial theorem](#)
[Generating Random Numbers](#)
[Generating random integers](#)
[Generating random integers with no repetition](#)
[Generating random decimals](#)
[Seeding the random number generator](#)

Chapter 17: Dealing with Statistical Data

[Entering Data](#)
[Deleting and Editing Data](#)
[Inserting Data Lists](#)
[Using Formulas to Enter Data](#)
[Copying and Recalling Data Lists](#)
[Sorting Data Lists](#)
[Sorting data lists while keeping the rows intact](#)

Chapter 18: Analyzing Statistical Data

[Plotting One-Variable Data](#)
[Constructing a histogram](#)
[Adjusting the class size of a histogram](#)
[Constructing a box plot](#)

[Plotting Two-Variable Data](#)

[Tracing Statistical Data Plots](#)

[Analyzing Statistical Data](#)

[One-variable data analysis](#)

[Two-variable data analysis](#)

[Performing regressions](#)

[Graphing a regression model](#)

[Graphing a residual plot](#)

[Using Manual-Fit](#)

[Using statistics commands on the Home screen](#)

Part V: Doing More with Your Calculator

Chapter 19: Using the TVM Solver

[Calculating Mortgages and Loans](#)

[Step 1. Access the TVM Solver](#)

[Step 2. Enter values for five of the six TVM variables](#)

[Step 3. Solve for the missing TVM variable](#)

[Making Compound Interest Work for You](#)

[Step 1. Access the TVM Solver](#)

[Step 2. Enter values for five of the six TVM variables](#)

[Step 3. Solve for the missing TVM variable](#)

Chapter 20: Communicating with a PC Using TI Connect Software

[Downloading TI Connect](#)

[Installing and Running TI Connect](#)

[Connecting Calculator and PC](#)

[Transferring Files](#)

[Using Device Explorer to transfer files from calculator to computer](#)

[Using Send to TI Device to transfer files from computer to calculator](#)

[Using the Backup and Restore Tools](#)

[Upgrading the OS](#)

Chapter 21: Communicating Between Calculators

[Linking Calculators](#)

[Transferring Files](#)

[Transferring Files to Several Calculators](#)

Chapter 22: Fun with Images

[Inserting Photo Images as a Background of a Graph](#)

[Using TI Connect Software to Transfer Images](#)

[Unit-to-Unit Image Transfer](#)

[Using Quick Plot & Fit Equation](#)

Chapter 23: Managing Memory

[Checking Available Memory](#)

[Deleting and Archiving to Preserve Memory](#)

[Resetting the Calculator](#)

[Grouping and Ungrouping Programs](#)

[Garbage Collecting](#)

Part VI: The Part of Tens

Chapter 24: Ten Essential Skills

[Copying and Pasting](#)

[Converting a Decimal to a Fraction](#)

[Changing the Mode](#)

[Accessing Hidden Menus](#)

[Entering Imaginary Numbers](#)

[Storing a variable](#)

[Graphing a Function](#)

[Finding the Intersection Point](#)

[Graphing a Scatter Plot](#)

[Performing a Linear Regression](#)

Chapter 25: Ten Common Errors

[Using !\[\]\(f507db636256ac11a5525ef93ec6b8d7_img.jpg\) Instead of !\[\]\(c034f68b5a2807a4ba9fbd993535bc3b_img.jpg\) to Indicate That a Number Is Negative](#)

[Indicating the Order of Operations Incorrectly by Using Parentheses](#)

[Improperly Entering the Argument for Menu Functions](#)

[Accidentally Deleting a List](#)

[Entering an Angle in Degrees in Radian Mode](#)

[Graphing Trigonometric Functions in Degree Mode](#)

[Graphing Functions When Stat Plots Are Active](#)

[Inadequately Setting the Display Contrast](#)

[Setting the Window Inappropriately for Graphing](#)

[Accidentally Deactivating a Function](#)

Chapter 26: Ten Common Error Messages

[ARGUMENT](#)

[BAD GUESS](#)

[DIMENSION MISMATCH](#)

[DOMAIN](#)

[INVALID](#)

[INVALID DIMENSION](#)

[NO SIGN CHANGE](#)

[SINGULAR MATRIX](#)

[SYNTAX](#)

[WINDOW RANGE](#)

[Troubleshooting a Calculator that is Not Functioning Properly](#)

Appendix A: Creating Calculator Programs

[Creating and saving a program on the calculator](#)

[Editing a program on the calculator](#)

[Executing a Calculator Program](#)

[Deleting a Program from the Calculator](#)

Appendix B: Controlling Program Input and Output

[Using Input Commands](#)

[Using the Input command](#)

[Using the Prompt command](#)

[Using Output Commands](#)

[Using a program to write text](#)

[Using the Disp command](#)

[Using the Output command](#)

[Using a Program to Display a Graph](#)

[Changing the Color and Graph Style of a Function](#)

[Changing the Color of Text on a Graph](#)

[Housekeeping Issues](#)

Appendix C: Controlling Program Flow

[Entering Control Commands in a Program](#)

[Using Decision Commands](#)

[The If command](#)

[The If ... Then ... End Command](#)

[The If ... Then ... Else ... End Command](#)

[Using Looping Commands](#)

[The While ... End command](#)

[The Repeat ... End Command](#)

[The For ... End Command](#)

[Using Looping Commands](#)

[Using the Goto command](#)

[Creating a menu](#)

[Stopping a Program](#)

[Pausing a Program](#)

[Executing an External Program as a Subroutine](#)

[Index](#)

[Cheat Sheet](#)

[End User License Agreement](#)

About the Authors

Jeff McCalla is currently teaching mathematics and coaching the golf team at St. Mary's Episcopal School in Memphis, TN. Jeff holds a Bachelor's Degree in Christian Education with a minor in mathematics from Wheaton College and a Master of Arts in Teaching degree from the University of Memphis. Jeff is the co-founder of the TI-Nspire SuperUser group, dedicated to providing advanced training from the world's foremost experts. In addition, he enjoys traveling the country, training teachers as an instructor for Texas Instruments T3 Program. Jeff also wrote *TI-Nspire For Dummies*. A highlight for Jeff was receiving the Presidential Award for Excellence in Science & Mathematics Teaching and with it, the opportunity to meet both President Obama and Secretary of Education, Arne Duncan. When he is not meeting important dignitaries, Jeff enjoys going to ballgames with his boys, playing golf and tennis, eating Chick-fil-A, reading Malcolm Gladwell and John Wooden, getting free stuff, teaching Sunday school, and making his wife smile.

C. C. Edwards has a Ph.D. in mathematics from the University of Wisconsin, Milwaukee, and is currently teaching mathematics on the undergraduate and graduate levels. She has been using technology in the classroom since before Texas Instruments came out with their first graphing calculator, and she frequently gives workshops at national and international conferences on using technology in the classroom. She has written forty activities for Texas Instrument's Explorations web site, and she was an editor of *Eightysomething*, a newsletter formerly published by Texas Instruments. She is also the author of *TI-83 Plus Graphing Calculator For Dummies*.

Just barely five feet tall, CC, as her friends call her, has three goals in life: to be six inches taller, to have naturally curly hair, and to be independently wealthy. As yet, she is nowhere close to meeting any of these goals. When she retires, she plans to become an old lady carpenter.

Dedication

This book is dedicated to my parents, Bud & Elaine McCalla, whose passion for mathematics rubbed off on me. I am most thankful for them not tossing me to the curb when I went through my annoying middle school years.

Author's Acknowledgments

I could not have written this book without the help and support of the people at Wiley. First and foremost, I want to thank my project editor, Blair Pottenger, whose expertise was indispensable in the writing process. I also want to thank my acquisitions editor, Amy Fandrei, for keeping me to a tight schedule and helping me with the content and outline of the book. It is my pleasure to thank Debbye Butler for her thoroughness and copy edit. Additionally, I want to thank Fred Decovsky, Ed. D., for verifying the mathematical and technical accuracy of this book.

I certainly want to thank my friends at Texas Instruments for their ongoing support. The leadership of Gayle Mujica, Charlyne Young, and Kevin Spry has helped make this project possible. In particular, Margo Mankus has come through for me every time I had questions about the new features on the TI-84 C. And, Lydia Neher for always keeping me up to date on the most recent OS changes. Of course, I want to thank Tonya Hancock for her role in fueling my calculator addiction.

Fellow T3 instructors have assisted me with their help when called upon. Jennifer Wilson's help has been instrumental in the writing of this book. Her eye for detail and general grammar mastery continue to amaze me. I want to thank Jill Gough, who constantly challenges my thinking about teaching. Bryson Perry's technical expertise has been an invaluable resource.

On the home front, I wish to thank my teaching colleagues, Orion Miller, Sandra Halfacre, and Chrystal

Hogan, who were nice resources when I had questions. I need to thank the administration at my school, Albert Throckmorton and Patti Ray, for their leadership and for allowing me to pursue my writing. I also want to thank my wife Shannon and my three boys, Matt, Josh, and Caleb, for putting up with me during the writing process. Finally, I want to thank the students I teach at St. Mary's Episcopal School, who are the inspiration for much of what I do.
