## **Sleep tight little Baby**

| The way to a firm sleep rhythm                        |
|---|
| Even babies need different amounts of sleep at        |
| <u>night</u>  |
| The baby has yet to find its sleep rhythm             |
| <u>Infants learn to calm themselves first</u>         |
| Sleeping well takes time - endurance is required      |
| here  |
| Every now and then, parents need extra tuition        |
| Good basis for soft and healthy baby sleep            |
| Infants need the experience of security and           |
| <u>reliability</u>                                    |
| Everyday routine helps the baby to find a rhythm      |
| Just a tired baby likes to sleep too                  |
| Prevent the baby from getting tired - otherwise it is |
| difficult to fall asleep and relax                    |
| Increased screaming and howling is often a sign of    |
| lack of sleep.  |
| Independence during the day also supports at night    |
| <u>(rest)</u>   |
| Sleeping independently makes sleeping through         |
| easier for the baby                                   |
| The appropriate sleeping environment is important for |
| a soft baby sleep                                     |
| <u>Safe baby sleep - always in supine position</u>    |
| Safe and secure stored in a cradle, bassinet or cot   |
| Good equipment of the sleeping place - with           |
| sleeping bag but without pillow                       |
| Don't wear the baby too thickly for baby sleep - this |
| is the best way to get a good night's sleep.          |
| Quality and safety always take priority when it       |
|   |
| <u>comes to cribs and cots</u>                        |
