Earning Money through Crypto Currency Airdrops, Bounties, Faucets, Cloud Mining Websites and Exchanges

By

Dr. Hidaia Mahmood Alassouli

1. Introduction:

A crypto faucet is a website that will give you satoshis in exchange for viewing ads or completing simple tasks. Crypto currency mining is the process in which transactions between users are verified and added into the block chain. The process of mining is also responsible for introducing new coins into the existing circulating supply and is one of the key elements that allow cryptocurrencies to work as a peer-to-peer decentralized network, without the need for a third party central authority.

Cloud mining happens in the “cloud.” That basically means that the hardware used for mining is not physically located at your premises, but it is accessed remotely through the internet.

An airdrop, in the cryptocurrency business, is a marketing stunt that involves sending free coins or tokens to wallet addresses in order to promote awareness of a new virtual currency.

In Bounty programs, participants get cryptocurrencies in exchange for promotion.

A cryptocurrency exchange is any system that operates on the basis of trading cryptocurrencies with other assets.

There are also some on-line service designed for those who wants to exchange electronic currencies quickly, safely and at a favorable rate, such as: Webmoney, Perfect Money, AdvCash, Payeer, Skrill, Neteller, Epay, Payza, PayPal, Visa/Master Card, Western union, MoneyGram, Bitcoin, Ethereum, Litecoin.
