About the Author

Ron Person is a Sr. Consultant for Business Optimization for Sitecore. Sitecore is recognized as the innovation leader in software that helps organizations engage customers with online and offline marketing. Ron continues to use processes described in the first sections of this book to help Sitecore's partners and customers reach their business objectives.

In the 27 years prior to joining Sitecore Ron helped organizations create a competitive advantage through strategic execution and a culture of high-performance.

Ron worked with mid-sized organizations with revenues of \$25 to \$500 million. His clients in the United States and internationally have included hospitals, banks, biotech companies, medical device manufacturers, and financial services firms, spanning a diversity of organizations such as:

- Medtronic CardioVascular
- Bethanie Group (Western Australia's largest elder care and hospital system)
- Wells Fargo Center for the Arts
- U.S. Army Corps of Engineers
- U.S. Naval Undersea Warfare Center

Prior to consulting in performance improvement Ron has been:

- A manager of competitive analysis for a Fortune 500 corporation
- One of Microsoft's first twelve consulting partners
- The founder or co-founder of four companies, two of them high-tech
- The author of 26 business and computer books, including four international bestsellers with almost 4 million copies in print

He has personally conducted workshops for thousands of business people and has spoken before conferences and groups such as Vistage (the world's leading Chief Executive organization), Microsoft technical conferences, the American Society for Quality, APICS (the Association for Operations Managers), the Project Management Institute, PIHRA (the Professionals in Human Resources Association), and the American Association of Homes and Services for the Aging.

Ron's education and credentials include:

- Certification by the Balanced Scorecard Collaborative, the educational division of the founders of Balanced Scorecard, Drs. Kaplan and Norton. Only a few independent consultants each year pass this rigorous training and examination.
- Member of the California Awards for Performance Excellence™ Board of Examiners, 2008 (California's Malcolm Baldrige award for excellence in organizational performance)
- A Six Sigma Black Belt
- An M.B.A. in marketing and finance with highest honors
- An M.S. in physics
- Training as a facilitator for strategic planning by the Institute for Cultural Affairs and the Center for Strategic Facilitation

Ron supports his readers and subscribers through his website **Critical To Success** at www.criticaltosuccess.com. His website is dedicated to helping business owners, managers, and professionals improve their personal and organizational performance. Ron's website contains:

- Tips
- Tricks
- Tools
- Techniques
- Tutorials
- Toolkits

About the Technical Editors

Jim Coffey has lead Strategy and Strategy Execution engagements using the Balanced Scorecard for a wide variety of public and private sector clients, including the US Army, the FBI, FedEx, Crown Castle, and the USC LA County Hospital. In addition to his strategy work, Jim does executive coaching and organizational development consulting to help organizations successfully navigate the cultural aspects of strategy execution.

Previously, Jim was a manager with PricewaterhouseCoopers (PwC). While there, he led numerous project teams responsible for process reengineering, cost estimates, and market competitive analysis. Prior to PwC, he worked in the power industry as a nuclear power plant performance evaluator with the Institute of Nuclear Power Operations and as a start-up engineer with General Electric Nuclear.

As a result, Jim has:

- Over twenty years of experience supervising personnel, managing multiple diverse technical programs with budgetary, planning, and customer interface responsibility
- Over fifteen years' experience in organizational strategy management and performance improvement efforts using Balanced Scorecard/Strategic Performance Measurement System methodologies; including managing, aligning and linking multiple organizational performance projects and initiatives
- Extensive experience using automated, web-based Balanced Scorecard Collaborative/Strategic Performance Measurement certified applications and tools for scorecard development and reporting

Education: MBA from the University of Chicago; Bachelor of Science in Engineering from The Ohio State University

Michael Alexander is a Microsoft Certified Application Developer (MCAD) and author of several books on advanced business analysis with Microsoft Access and Excel. He has more than 16 years of experience consulting and developing Office solutions. Michael has been named a Microsoft MVP for his ongoing contributions to the Excel community. Visit him at www.datapigtechnologies.com.

Acknowledgments

With the second edition of this book I continue to realize how we help each other expand our knowledge, improve our lives, and improve our world. I am very grateful for the opportunity to have worked with so many outstanding people. It is to the many high energy, hardworking, and spirited people I've worked with that I dedicate this book.

I want to thank Michael Seifert, CEO of Sitecore, and Lars Petersen, Head of Sitecore's Business Optimization Services for the opportunity to work with a global group of dynamic, intelligent people who are changing the way the world does business.

James Coffey deserves praise for not just reviewing the sections on strategy and Balanced Scorecard, but also for adding depth that comes from his years of experience in Balanced Scorecard consulting and working for the Palladium Group, Drs. Kaplan and Norton's consultancy.

Michael Alexander had the difficult job of reviewing the technical sections that covered three versions of Excel. His experience added to those sections. Michael's expertise in Excel and Access is visible in his books for John Wiley & Sons as well as his consulting website, DataPig Technologies.

Having been a consultant for almost 30 years, I realize that one of the responsibilities of a consultant is collecting and filtering ideas that help clients, and then putting the best ones into practice in ways that make them productive and beneficial. There are many people and sources who have built the foundation of the ideas presented in this book. Here are a few I would like to thank.

Thank you to Drs. Kaplan and Norton of the Palladium Group for furthering the advancement of management science with Balanced Scorecards and Strategy Maps.

Each year, a few consultants complete the Balanced Scorecard certification program delivered through the Balanced Scorecard Collaborative, the educational division of the Palladium Group. Thank you to Edward A. Barrows, Jr., independent consultant and former Vice President of Balanced Scorecard Collaborative, a Palladium company, and Karen A. DiMartino, Manager, Advisory Services, for conducting excellent Balanced Scorecard certification programs.

The consulting profession can often be lonely, and the opportunities to develop our professional skills are neglected as we help clients and spend time with family. Many people have committed extra time to developing the professional skills of consultants, and we consultants owe them a debt of gratitude. Throughout the years I've enjoyed their camaraderie and shared learning. A few of these people in northern California are:

- Harry Chapman, Bay Area Consulting Group, founder of the Bay Area Consultants Network
- Rogene Baxter, the Bridgewater Group, former president of the Institute of Management Consultants, Northern California Chapter
- Jane Stallman, Center for Strategic Facilitation

After having written more than 20 books, I wasn't sure I wanted to write again, but working with a great team from Wiley Publishing has made it easy to get back in the saddle. Thanks to:

- Jim Minatel, Associate Publisher, for proposing and expanding on the second edition
- Carol Long, Executive Editor, for working out all the business details
- Sydney Jones Argenta, Project Editor, for being so easy to work with while maintaining an even flow of work. She seemed to magically make the work flow.

There have been many people who have reviewed this book, but the responsibility for accuracy and the descriptions of real-world business solutions lie with me. If you, the reader, find an error or something about which you have a question, please contact me through www.criticaltosuccess.com.

To Your Best Performance,
Ron

Contents

Introduction	xxi
Part I Strategic Performance with Balanced Scorecards	1
Chapter 1 Accelerating Strategic Performance	3
Managing with a 500-Year-Old System	3
The Failure of Modern Management Systems	5
A Modern Strategic Management System	6
Why Use a Balanced Scorecard?	7
Building a Balanced Scorecard	9
Does the Balanced Scorecard Guarantee Business Success?	10
Does the Balanced Scorecard Really Work?	12
Do Small and Midsized Businesses Benefit from the Balanced Scorecard?	13
Is the Balanced Scorecard Worth Developing?	14
Summary	15
Notes	15
Chapter 2 Developing Your Strategic Foundation	17
Developing Your Strategic Foundation	18
Mission	19
Vision	19
Values	23
Developing Your Strategic Assessment	24
Defining Your External Environment by Using PESTEL	25
Defining Your Industry Environment with Porter's 5 Forces	26
Defining Your Strengths and Weaknesses with the Balanced Scorecard SWOT	27
Developing Your Strategic Destination Statement	29

	Summary	30
	Notes	30
Chapter 3	Preparing to Build Your Balanced Scorecard	31
	Why Use a Balanced Scorecard?	31
	Is Your Organization Ready for the Balanced Scorecard Journey?	33
	Senior Executive Commitment	33
	Experienced Facilitator or Consultant	34
	Executive Sponsor Commitment	35
	Executive Time and Commitment	35
	Participative Culture with Open Communication	35
	You Must Make Your Case for Change	36
	Motivating Executives	37
	Building Balanced Scorecard Teams	39
	Background Research	42
	Interviewing Executives	43
	Summary	45
	Notes	46
Chapter 4	Step-by-Step to Building Your Strategy Map	47
	What Is a Strategy Map?	48
	Leveraging Your Strategy Map	50
	Perspectives: Monitoring Your Strategy from Different Points of View	50
	Strategic Themes: Concentrating Resources and Momentum along Specific Themes	51
	Objectives and Causal Links: Modeling What Drives Your Business Success	53
	Selecting a Strategy Map Facilitator	54
	Step-by-Step to Creating Your Strategy Map	55
	The Straw Dog Approach	55
	The Brainstorm and Intensive Discussion Approach	56
	Conducting Strategy Map Sessions	58
	Selecting Strategic Theme Sponsors	60
	Summary	60
	Notes	60
Chapter 5	Step-by-Step from Strategy to Action	61
	Turning Your Strategy Map into Measurable Action	61
	Strategic Theme Teams	63
	Motivating and Educating the Strategic Theme Teams	64
	Brainstorming Initiatives	65
	Developing a Robust List of Initiatives	68
	Prioritizing Initiatives	69
	Summary	70
	Note	70

Chapter 6	Step-by-Step to Selecting Metrics and Setting Targets	71
	Achieving Balance in Your Balanced Scorecard	72
	The Right Number of Measures	73
	If You Have More Than the “Critical Few,” You Lose	73
	Leading and Lagging Metrics: Drivers and Results	74
	Sample Objectives and Metrics	74
	Step-by-Step to Selecting Your Metrics	77
	Defining the Metric with a Metric Definition	78
	Look Out! What You Measure Is What You Get!	79
	Critical Questions to Ask about Your Measures and Metrics	80
	Setting Targets	81
	Setting Target Values	82
	Setting Intermediate Targets	82
	You Will Not Move toward a Target at a Constant Rate	83
	Summary	83
Chapter 7	Step-by-Step to Developing Your Implementation Plan	85
	Step-by-Step to Translating Initiatives into Projects	85
	Monitoring Initiatives in Progress	88
	Summary	89
Chapter 8	Step-by-Step to Rollout and Strategic Reviews	91
	Creating a Culture Focused on Strategy	91
	Strategy Review Meeting	92
	Preparing for the Strategy Review Meeting	95
	Facilitating the First Meeting	96
	Communication, Training, and Rollout	96
	Communication	96
	Communication Media	97
	Training	98
	Summary	99
Part II	Operational Performance with Dashboards	101
Chapter 9	Developing Executive and Operational Dashboards	103
	Why Are Dashboards Used with Increasing Frequency?	104
	The Differences between Dashboards and Scorecards	105
	Challenges in Developing Dashboards	106
	Developing Your Dashboard	107
	Summary	108
Chapter 10	Mapping Your Operational Processes	109
	Before You Map, Know Why	110
	Dashboards and Six Sigma	110
	Types of Process Mapping	111
	Six Sigma SIPOC Mapping	112
	Value Stream Mapping	114
	Step-by-Step to Building a Map	117
	Summary	119

Chapter 11	Identifying Critical Metrics and Key Performance Indicators	121
	General Rules for Metrics in Operational Dashboards	121
	Interview the Decision-Makers	123
	Identify Metrics Using Your Map	124
	Step-by-Step to Identifying Critical Metrics	125
	Brainstorming and Identifying Metrics Using an Ishikawa or Fishbone Diagram	125
	Selecting a Metric	127
	Cross-Check Your Metric	129
	What's Simple Can Be Difficult, and What's Difficult Can Be Simple	130
	Summary	131
Part III	Building Maps, Scorecards, and Dashboards	133
Chapter 12	Creating Dashboards for Decision-Making	135
	Step-by-Step: Creating Dashboards That Aid Decision-Making	135
	Make Your Dashboards Actionable	137
	Rules of Design	138
	Tips on Graphical Elements	141
	Some Important Sources on the Art and Science of Visualizing Data	143
	Excel Charting Techniques	143
	The Art of Visualizing Data	144
	Summary	145
Chapter 13	Drawing Process and Strategy Maps	147
	Which Drawing Tool Should You Use?	147
	Drawing with Microsoft Office Drawing Tools	148
	Displaying the Drawing Toolbar in Versions of Office Prior to 2007 and 2010	149
	Drawing Objects and Connectors	149
	Adding Text to Objects or Connectors	151
	Moving Objects or Connectors	151
	Formatting Objects or Connectors	151
	Grouping Objects So That They Act as One	151
	Using Grid and Nudge for Accurate Positioning	151
	Controlling Objects That Overlap	152
	Saving Time When You Draw	152
	Drawing with Microsoft Visio	153
	Summary	155
Chapter 14	Using Microsoft Excel for Balanced Scorecards and Dashboards	157
	Excel Is the Most Widely Used Balanced Scorecard Software	157
	Consider the Trade-Offs between Excel and Large BI Systems	158
	Disadvantages of Excel	159
	Many Versions of One Truth	160
	Technical Scalability versus User Scalability	160

Hidden Errors	161
Spreadsheets Spawn Spreadsheets	161

When to Use Excel	164
Solutions	165
Summary	166
Chapter 15 Text-Based Dashboards	167
Alerting with Conditional Formats	168
Conditional Formatting with Earlier Versions of Excel	169
Conditional Color Formatting with Excel 2007 and Excel 2010	170
Creating In-Cell Charts with Text	172
Creating Text Charts with Earlier Versions of Excel	173
Creating Data Bars with Excel 2007 and Excel 2010	174
Alerting with Conditional Text Icons	175
Creating Conditional Icons with Earlier Versions of Excel	176
Creating Conditional Icons with Excel 2007 and Excel 2010	179
Summary	181
Chapter 16 Custom Labels and Formatting	183
Combining Numbers, Text, and Dates to Create Custom Labels	184
Joining Text with Custom-Formatted Numbers	184
Joining Text with Custom-Formatted Dates and Times	186
Time and Data Calculations	187
Calculating the Beginning and End of Any Month	188
Creating a Month Series	188
Calculating the Beginning and End of a Quarter	189
Automatically Updating Quarterly Titles on the Category (x) Axis	190
Scaling Numbers with Formatting	191
Scaling Charts and Sheets Separately	192
Creating Custom Titles and Floating Text	193
Creating Dynamic Chart Titles	193
Creating Floating Titles in Charts	194
Creating Dynamic Titles That Float in Worksheets	195
Rotating Text, Shapes, and Charts in Any Direction by Using a Picture of Cells	195
Creating Custom Data Labels	197
Creating Pop-Up and Alert Data Labels	198
Creating New Color Palettes	200
Creating a Custom Color Palette in Excel 2003	201

Matching Your Dashboard to the Corporate Identity	202
Transferring Color Palettes between Workbooks	202
Creating Aesthetically Pleasing Color Palettes	203
Summary	206
Chapter 17 Working with Data That Changes Size	207
Using Tables for Data That Changes Size	208
Formatting Tables	210
Attaching a Dynamic Range Name to a Table	210
Tables Use English-Like Formula References	211
Naming Ranges for Ease of Use and Functionality	211
Creating Named Ranges	212
When to Use Tables or Dynamic Range Names	215
Creating Dynamic Range Names That Adjust	
Automatically When the Size of Data Changes	216
Creating Charts That Expand to Include New Data	219
Dynamically Changing a Chart's Start Date	222
Dynamically Changing a Chart's Start Date and Width	224
Dynamically Charting the Last 13 Months of Data	225
Creating Dynamic Range Names for Lists	226
Summary	228
Chapter 18 Retrieving Data from Lists and Tables of Data	229
More Powerful Than VLOOKUP: INDEX and MATCH	229
The Key to Retrieving Data and Creating Interactive Dashboards	232
Using a Keyword to Retrieve and Chart Data	232
Adding a Drop-Down Selection List to Make Retrieval Easier	234
Retrieving Data Given Multiple Keywords	236
Retrieving Multiple Rows Using a Single Keyword	237
Retrieving Data with a Two-Way Lookup	240
Summary	241
Chapter 19 Creating Miniature Charts and Tables	243
Using Miniature Charts, Tables, and Sparklines for Greater	
Information Density and Improved Layout	244
Creating Miniature Charts from Standard Excel Charts	247
Removing Titles, Grid Lines, and Legends	248
Formatting the Y-Axis to Remove Unnecessary	
Scales and Width	249
Reducing the Size and Width of Y-Axis Numeric Values	250
Formatting the X-Axis	253
Formatting Multiple Miniature Charts	256
Creating Sparklines	257
Modifying or Deleting Sparklines	260
Sparkline Tricks	260
Excel's Amazing Camera Tool	262
Taking Pictures with the Camera Tool	263
Using Camera Pictures of Charts, Tables, and Miniature Charts	264

	Simultaneously Formatting the Size of Multiple Charts or Camera Pictures	265
	The Dark Side of Excel's Camera Tool	266
	Summary	266
Chapter 20	Controlling Charts with Menus, Combo Boxes, and Buttons	267
	Adding Combo Boxes, Lists, Check Boxes, and More to Your Dashboards	268
	Selecting Data with a Combo Box or List	271
	Selecting Data with Multiple Criteria Using Multiple Combo Boxes	275
	When to Use a Data Validation List or Combo Box	276
	Creating Dynamic Cascading Combo Boxes or Lists	277
	Using Option Buttons	279
	Displaying or Hiding Data with a Check Box	279
	Scrolling Charts through Time with a Slider Bar	280
	Summary	282
Chapter 21	Working with PivotTables	283
	Basic Concepts of PivotTables	284
	Creating an Auto-Expanding Database or List Name	286
	Using PivotTable Results in Dashboards	289
	Retrieving a Single Cell of Data from a PivotTable	290
	Dynamically Retrieving Data from a PivotTable	291
	Building a Safe User-Controlled PivotTable Display	292
	Drilling Down to Detail with PivotTables	295
	Updating the PivotTable Linked to Internal or External Data	296
	Summary	296
Chapter 22	Working with PowerPivot	297
	Basic PowerPivot Concepts	297
	PowerPivot Advantages	299
	PowerPivot Disadvantages	300
	Downloading and Installing the Free PowerPivot Add-In	301
	Downloading Sample Demos for PowerPivot	302
	Connecting to Data	302
	Creating PivotTables or PivotCharts with PowerPivot	304
	Building Free-Form Reports with PowerPivot and GetPivotData	305
	Sorting Months in Date Order with the Custom Sort Order List	308
	Calculating Fields with Data Analysis Expressions (DAX)	312
	Summary	315
Chapter 23	Smoothing Data and Forecasting Trends	317
	Smoothing Erratic Data	318
	Smoothing Data with Simple Moving Averages	318
	Smoothing Data with Weighted Moving Averages	320
	Exponential Weighted Moving Average	321
	Adding the Analysis ToolPak to Excel	323
	Exponential Smoothing with Analysis ToolPak	324

Forecasting Trends	326
Forecasting with Worksheet Functions	326
Summary	329
Chapter 24 Identifying Targets and Displaying Alerts	331
Charting Target Values	332
Charting Alerts with Conditional Colors	334
Charting Alerts for the Top/Bottom <i>n</i> , Quartiles, and Percentiles	337
Charting Alerts with Line and XY Scatter Diagrams	340
Adding a Visual Indicator to Top/Bottom <i>n</i> , Quartile, and Percentile Charts	341
Alerting with E-mailing	342
Summary	344
Chapter 25 Building Powerful Decision-Making Charts	347
Seeing a Full Statistical Picture with a Box-and-Whisker Plot	348
Bullet Charts: A Better Alternative to Gauges	353
Pareto Charts Show What Is Most Important	360
Variance Charts Make a Difference	363
Project Your Projects with Gantt Charts	365
Project Variance Gantt Charts	367
Control Charts	368
Summary	370
Chapter 26 Drilling to Detail	371
Navigating	372
Navigating with Simple Hyperlinks	372
Navigating with a Drop-Down Menu	376
Drilling Down to Detail	378
Drill-Downs in PivotTables and PowerPivots	378
Drilling into a Data List by Clicking a Row	379
Summary	383
Chapter 27 Using Excel Add-Ins for Extra Capabilities	385
ASAP Utilities	385
FlowBreeze Flowcharting	386
Systems2Win Value Stream Mapping	388
PowerPivot	390
Simtools	391
Formlist	392
Managing Excel Add-Ins	392
Summary	393
Chapter 28 Finishing Touches	395
Adding Context and Comments with Briefing Books	395
Displaying Pop-Up Content and Dynamic Help	396
Controlling Dashboard Display	398
Hiding Worksheets	399

Sending Conditional E-mails from Dashboards	399
Adding Headers and Footers	401
Locating and Removing Phantom Links	402
Protecting Content, Worksheets, and Workbooks	402
Restricting the User's Range	403
Summary	404
Chapter 29 Data Integration Methods	405
Should You Use Manual Data Entry or Automated Data Integration?	406
Manual Data Entry for Dashboards	407
Automating Data Retrieval with Text Files	408
Creating Text Data Files	408
Step-by-Step to Importing a Text Data File	409
Automating Data Retrieval from Databases	414
Step-by-Step to Importing Data from a Relational Database	415
Importing Data Using a PivotTable	418
Importing Data to a PivotTable	419
Refreshing Data Automatically	420
Linking Imported Data to Your Dashboard	421
What Is OLAP, and When Should You Use It?	422
Summary	423
Chapter 30 Publishing Balanced Scorecards and Dashboards	425
Publishing Directly in Excel	426
Workbook Architecture	427
Publishing Multidashboard Systems	428
Hierarchy of Views	429
Deciding How to Publish Your Scorecard or Dashboard	430
Publishing in PowerPoint	431
Advantages and Disadvantages of Publishing in PowerPoint	432
PowerPoint Architecture	432
When You Should Use PowerPoint for Publishing	433
Creating the PowerPoint Presentation	434
Publishing in PDF	435
Advantages and Disadvantages of Publishing in PDF	436
PDF Architecture	437
Creating Complex or High-Security Balanced Scorecards in PDF	437
Summary	438
Index	441

Introduction

This book is a guide to how your organization can create a competitive advantage by successfully executing strategy and accelerating performance. You must begin with a vision held by and communicated through leadership to every employee. That vision is achieved when employees work in concert, knowing how they contribute to strategic success and operational performance. A Strategy Map and Balanced Scorecard are the tools you need to gather the information that shows you how you can achieve strategic success. Operational maps and operational dashboards are the tools and measures that show you how to accelerate operational success.

Since I wrote the first edition of this book, the world has undergone significant change. With continued globalization and the global recession, it's even more apparent that winning organizations possess two attributes. They must be flexible enough to pivot in new directions, and they must focus on their core strategic strengths:

- Winning organizations continually monitor their performance and are willing to pivot with a better strategy. To monitor their performance, they need operational dashboards that measure the Critical Few operational metrics specific to their organization.
- Winning organizations must focus their people, processes, and technology. To do that, they need a Balanced Scorecard that helps the organization stay aligned with its core strategic strengths.

As I move between organizations of all types, I am continuously amazed at the cultural differences between winners and those that just get by. The culture I see in winning organizations is one of high energy, proactive execution, and continuous learning. In general, everyone is aligned with the key strategic and

operational objectives. When an effort works, it's leveraged. When an effort doesn't work, time isn't spent on blaming. Instead, everyone works to improve performance. This attitude comes from the leadership and the people, but the tools that identify performance are operational dashboards and Balanced Scorecards.

I enjoy, and am continually heartened by, the 10 to 20 e-mails per week from readers. Among these is the occasional request for a list of generic metrics. This piques my curiosity, because one of my main reasons for writing this book was to emphasize the importance of the Critical Few objectives and metrics. The Critical Few are specific to your organization. The best way I've found to identify them is to use the group brainstorming and mapping processes described in this book. Don't pick metrics from a generic list! Use the processes described here to identify the Critical Few objectives, identify their drivers and success measures, and then look for metrics to measure their performance.

After 30 years as a road warrior consultant, I have amassed a huge performance-improvement toolkit. I want to share with as many people and organizations as possible this collection of tips, tools, and techniques. If you'd like to benefit from this collection, I welcome you to. Go to <http://www.criticaltosuccess.com>.

To your best performance!

Ron

Success through Strategic Execution and Accelerating Operational Performance

Business horror stories repeat themselves. We've all seen the numbers that define the stories:

- 90 percent of corporate strategies fail to achieve their expected results.
- 80 percent of projects are late or over budget.
- 70 percent of mergers fail to exceed the value of the original companies.

Those are pretty uncomfortable statistics. On the other hand, some organizations succeed well beyond expectations. One famous bank merger achieved a 19-fold profit increase in three years. One hotel chain increased its profit margin 3 percent over the industry average in three years. What is the difference between the terrible failures and the huge successes?

Whether at the macro level of executing your strategy and aligning your company or at the micro level of creating a project team that meets deadlines, a few core principles remain the same:

- Create a "burning platform" that moves people away from business as usual.
- Identify the objectives most critical to success.

- Define the initiatives that will make those objectives succeed.
- Select the Critical Few metrics that track performance and alignment.
- Create a culture of measurable high performance while breaking down silos.
- Maintain and sustain the high-performance culture.

Some of my clients who have been through the processes described in this book have said the following:

- “Our leadership team had the best strategic discussions they have ever had.”
- “The budget process was significantly easier than in any previous year.”
- “This process is changing our entire culture to keep up with our high growth.”

Who This Book Will Help

This book is built to be a practical guide; it doesn’t contain much theory. Many other books describe theory and case studies for Balanced Scorecards, Six Sigma, Lean, and other performance-improvement methods. This book is intended to be a guide for the people who take action. It will help you map your future, identify the Critical Few metrics, implement the Balanced Scorecard, and create operational dashboards.

This book has three different audiences: the executive sponsor or operations manager, facilitators and consultants, and software developers.

Executive Sponsor

Balanced Scorecards and performance-improvement programs don’t succeed without an executive sponsor. Members of the executive leadership team and the senior managers who are team leaders should scan Parts I and II of this book to understand the time frames and commitments involved in creating success.

Members of the executive leadership team who have heard the term Balanced Scorecard may not know what it takes to drive strategic success with a Balanced Scorecard. They can scan Part I to see what is involved. It takes time and commitment from the executive leadership team.

Two telephone calls from senior managers remind me that many do not know what is involved in creating a Balanced Scorecard or how it affects an organization when implemented correctly. In one call, the manager said, “We’re having a two-day corporate retreat for the executive leadership team. Could you do a Balanced Scorecard for us in two hours?”

Another call illustrated the business buzzword effect. It was from a manager whose division executive had heard about a Balanced Scorecard being used at a pharmaceutical competitor. He had been assigned to put together a Balanced Scorecard for the division within the next week.

Neither of these cases had executive commitment or the time frames necessary to create a Balanced Scorecard that drives success and creates a culture of high performance.

Facilitators and Consultants

Facilitators and consultants are vital to creating a Balanced Scorecard or operational dashboard. They are the guides who help the executive leadership team and managers through sticky spots. When discussions get too easy because no one is asking the hard questions, the facilitator must be able to step in and ask probing questions that put a tough issue in the spotlight so that it will be addressed. It is imperative, especially in the case of strategic Balanced Scorecards, to have a consultant who has no agenda and who is politically impartial.

Software Developers

The majority of Balanced Scorecards and operational dashboards are created in Microsoft Excel. You don't need to be an Excel Visual Basic guru to build them when you know the correct combination of worksheet functions. Part III describes most of the building blocks for creating and maintaining powerful scorecards and dashboards.

BUILD A SCORECARD OR DASHBOARD YOU CAN MAINTAIN

Part III covers the methods and tools necessary for building powerful decision-making aids in three different versions of Excel. But there is more to building them than just a few techniques. Make sure your Excel developer knows how to build systems that can be easily maintained and updated. Whether you use an internal or external developer, make sure he or she documents the system and shows others how to maintain it.

Additional skills the software developer needs are the ability to interview users to discover their needs, understand what is critical in a business process, design user interfaces, build maintainable architectures, and integrate live data.

How This Book Is Organized

This book has three parts. Part I covers the steps and processes required for building a Balanced Scorecard to execute strategy. Part II introduces the basics of mapping operational processes and identifying critical metrics. Part III shows intermediate-to-advanced Excel users techniques specific to creating dashboards.

Part I

Part I describes the journey of building and rolling out the Strategy Map and Balanced Scorecard. It is used by over 50 percent of Fortune 1000 companies and more than 70 percent of international corporations. It begins with an overview of the tools commonly used to develop organizational strategy. A chapter is devoted to building the Strategy Map, the diagram that visually defines the strategic themes on which the organization will focus and the objectives that will drive success. The next chapter describes how the Strategy Map must be converted into an action plan that details the initiatives to reach success and the metrics required to keep those initiatives on track and on time. Once the metrics are defined, the Balanced Scorecard can be developed and used—not just as a dashboard for strategic progress, but as a core mechanism to guide ongoing strategy meetings. The last chapter of Part I describes some of the communication and rollout processes necessary to communicate the change.

Part II

The three chapters in Part II describe a few methods of mapping operations. These include process maps and economic value maps, as well as how to use them to identify the Critical Few metrics that drive an operation and measure its success.

Part III

Part III gives many specific examples of how to use Excel 2003, 2007, and 2010 to build Balanced Scorecards and operational dashboards. Excel is the most widely used business analysis and graphics tool in the world; the majority of Balanced Scorecards and operational dashboards in the world are built using Excel. Scorecards and dashboards in Excel do not need to use Visual Basic for Applications, but they do need a good architecture, and they require a few little-known worksheet functions.

Free Resources That Extend This Book

There is much more to executing strategy and creating high performance than will fit in this book. You can find newsletters, articles, tools, video demonstrations, and software at <http://www.criticaltosuccess.com>.

Download Free Excel Sample Files

The Excel training examples featured in Part III are available for free download. Go to my website or the publisher's website:

Free Balanced Scorecard and Operational Dashboard Tips, Tools, and Tutorials

Staying ahead of the competition and keeping your organization performing at its highest level is an ongoing process. To get a jump start on improving your execution and performance advantage, go to <http://www.criticaltosuccess.com> for additional tips, tools, tutorials, and videos.

While you are at the Critical To Success website, be sure to sign up for the newsletter. It will keep you up to date with the best tips to help you grow as a business owner, manager, or professional.

Videos and Online Tutorials

No book can convey all the lessons learned through years of experience. Some processes and techniques are just too difficult to convey completely in text. And many tips, templates, and toolkits just can't fit in this book.

To learn more about the video and online tutorials to help you and your organization improve, go to <http://www.criticaltosuccess.com>.

Strategic Performance with Balanced Scorecards

In This Part

- Chapter 1: Accelerating Strategic Performance
- Chapter 2: Developing Your Strategic Foundation
- Chapter 3: Preparing to Build Your Balanced Scorecard
- Chapter 4: Step-by-Step to Building Your Strategy Map
- Chapter 5: Step-by-Step from Strategy to Action
- Chapter 6: Step-by-Step to Selecting Metrics and Setting Targets
- Chapter 7: Step-by-Step to Developing Your Implementation Plan
- Chapter 8: Step-by-Step to Rollout and Strategic Reviews
